READER'S GUIDE TO THE PENNSYLVANIA BULLETIN AND PENNSYLVANIA CODE

Pennsylvania Bulletin

The *Pennsylvania Bulletin* is the official gazette of the Commonwealth of Pennsylvania. It is published every week and includes a table of contents. A cumulative subject matter index is published quarterly.

The *Pennsylvania Bulletin* serves several purposes. First, it is the temporary supplement to the *Pennsylvania Code*, which is the official codification of agency rules and regulations and other statutorily authorized documents. Changes in the codified text, whether by adoption, amendment, repeal or emergency action must be published in the *Pennsylvania Bulletin*. Further, agencies proposing changes to the codified text do so in the *Pennsylvania Bulletin*.

Second, the *Pennsylvania Bulletin* also publishes: Governor's Executive Orders; State Contract Notices; Summaries of Enacted Statutes; Statewide and Local Court Rules; Attorney General Opinions; Motor Carrier Applications before the Public Utility Commission; Applications and Actions before the Department of Environmental Protection; Orders of the Independent Regulatory Review Commission; and other documents authorized by law.

The text of certain documents published in the *Pennsylvania Bulletin* is the only valid and enforceable text. Courts are required to take judicial notice of the *Pennsylvania Bulletin*.

Adoption, Amendment or Repeal of Regulations

Generally an agency wishing to adopt, amend or repeal regulations must first publish in the *Pennsylvania Bulletin* a Notice of Proposed Rulemaking. There are limited instances where the agency may omit the proposal step; they still must publish the adopted version.

The Notice of Proposed Rulemaking contains the full text of the change, the agency contact person, a fiscal note required by law and background for the action.

The agency then allows sufficient time for public comment before taking final action. An adopted proposal must be published in the *Pennsylvania*

Bulletin before it can take effect. If the agency wishes to adopt changes to the Notice of Proposed Rulemaking to enlarge the scope, they must re-propose.

Citation to the *Pennsylvania Bulletin*

Cite material in the *Pennsylvania Bulletin* by volume number and page number. Example: Volume 1, *Pennsylvania Bulletin*, page 801 (short form: 1 Pa.B. 801).

Pennsylvania Code

The *Pennsylvania Code* is the official codification of rules and regulations issued by Commonwealth agencies and other statutorily authorized documents. The *Pennsylvania Bulletin* is the temporary supplement to the *Pennsylvania Code*, printing changes as soon as they occur. These changes are then permanently codified by the *Pennsylvania Code Reporter*, a monthly, loose-leaf supplement.

The *Pennsylvania Code* is cited by title number and section number. Example: Title 10 *Pennsylvania Code*, § 1.1 (short form: 10 Pa.Code § 1.1).

Under the *Pennsylvania Code* codification system, each regulation is assigned a unique number by title and section. Titles roughly parallel the organization of Commonwealth government. Title 1 *Pennsylvania Code* lists every agency and its corresponding *Code* title location.

How to Find Documents

Search for your area of interest in the *Pennsylvania Code*.

The *Pennsylvania Code* contains, as Finding Aids, subject indexes for the complete *Code* and for each individual title, a list of Statutes Used As Authority for Adopting Rules and a list of annotated cases. Source Notes give you the history of the documents. To see if there have been recent changes, not yet codified, check the List of *Pennsylvania Code* Chapters Affected in the most recent issue of the *Pennsylvania Bulletin*.

The *Pennsylvania Bulletin* also publishes a quarterly List of Pennsylvania Code Sections Affected which lists the regulations in numerical order, followed by the citation to the *Pennsylvania Bulletin* in which the change occurred.

Printing Format

Material proposed to be added to an existing rule or regulation is printed in **bold face** and material proposed to be deleted from such a rule or regulation is enclosed in brackets [] and printed in **bold face**. Asterisks indicate ellipsis of *Pennsylvania Code* text retained without change. Proposed new or additional regulations are printed in ordinary style face.

Fiscal Notes

Section 612 of The Administrative Code of 1929 (71 P. S. § 232) requires that the Office of Budget prepare a fiscal note for regulatory actions and administrative procedures of the administrative departments, boards, commissions or authorities receiving money from the State Treasury stating whether the proposed action or procedure causes a loss of revenue or an increase in the cost of programs for the Commonwealth or its political subdivisions; that the fiscal note be published in the *Pennsylvania Bulletin* at the same time as the proposed change is advertised; and that the fiscal note shall provide the following information: (1) the designation of the fund out of which the appropriation providing for expenditures under the action or procedure shall be made; (2) the probable cost for the fiscal year the program is implemented; (3) projected cost estimate of the program for each of the five succeeding fiscal years; (4) fiscal history of the program for which expenditures are to be made; (5) probable loss of revenue for the fiscal year of its implementation; (6) projected loss of revenue from the program for each of the five succeeding fiscal years; (7) line item, if any, of the General Appropriation Act or other appropriation act out of which expenditures or losses of Commonwealth funds shall occur as a result of the action or procedures; (8) recommendation, if any, of the Secretary of the Budget and the reasons therefor.

The required information is published in the foregoing order immediately following the proposed change to which it relates; the omission of an item indicates that the agency text of the fiscal note states that there is no information available with respect thereto. In items (3) and (6) information is set forth for the first through fifth fiscal years; in that order, following the year the program is implemented, which is stated. In item (4) information is set forth for the current and two immediately preceding years, in that order. In item (8) the recommendation, if any, made by the Secretary of Budget is published with the fiscal note. See 4 Pa. Code § 7.231 *et seq.* Where “no fiscal impact” is published, the statement means no additional cost or revenue loss to the Commonwealth or its local political subdivision is intended.

Reproduction, Dissemination or Publication of Information

Third parties may not take information from the *Pennsylvania Code* and *Pennsylvania Bulletin* and reproduce, disseminate or publish such information except as provided by 1 Pa. Code § 3.44. 1 Pa. Code § 3.44 reads as follows:

§ 3.44. General permission to reproduce content of Code and Bulletin.

Information published under this part, which information includes, but is not limited to, cross references, tables of cases, notes of decisions, tables of contents, indexes, source notes, authority notes, numerical lists and codification guides, other than the actual text of rules or regulations may be reproduced only with the written consent of the Bureau. The information which appears on the same leaf with the text of a rule or regulation, however, may be incidentally reproduced in connection with the reproduction of the rule or regulation, if the reproduction is for the private use of a subscriber and not for resale. There are no other restrictions on the reproduction of information published under this part, and the Commonwealth hereby consents to a reproduction.

PROPOSED RULEMAKING

DEPARTMENT OF COMMUNITY AND ECONOMIC DEVELOPMENT

[12 PA. CODE CH. 145]
Industrialized Housing

The Department of Community and Economic Development (Department), under section 5 of the Industrialized Housing Act (act) (35 P.S. § 1651.5), proposes to amend 12 Pa. Code by revising Chapter 145 (relating to industrial housing and components). The purpose of the proposed rulemaking is to further clarify and strengthen the Department's and third-party's role in monitoring the production of industrialized housing; to eliminate redundant requirements; to update definitions to conformance with current terminology; to provide builders and code officials with documentation to clearly identify the manufacturer as approved to produce industrialized housing.

Introduction

The act established uniform State standards and procedures for the identification, inspection of manufacture and assembly, and certification of industrialized housing and those components forming integral parts of housing structures for use in all communities in this Commonwealth, and reciprocity in the recognition of certification of the industrialized housing and housing components, as standards for performance of industrialized housing and housing components are developed and adopted by the United States Department of Housing and Urban Development, other states, and the Commonwealth. The act authorized the Department to promulgate and amend rules and regulations to interpret and make specific the provisions of the act. The purpose of the proposed rulemaking is to update the regulations to bring them into conformance with current industry standards, codes and practices.

Analysis

Section 145.1 (relating to definitions) has been amended to update the definitions of "industrialized housing" and "residential occupancy" to reflect the changes in the use and occupancy groups as defined by the International Building Code; remove the definitions of "BOCA" and "CABO" as both are obsolete terms; add a definition of the term "Notice of Approval" which has been included into the regulations in § 145.82 (relating to issuance of building permits); and add a definition for the term "Site Installation Inspection Report Form" that has been required under § 145.91(e) (relating to reports to the Department) but not defined.

Section 145.33 (relating to manufactured homes excluded) has been expanded to provide clarity in regards to excluding industrialized homes from the Federal program for manufactured housing in an effort to assure that both consumers and local zoning and code officials are clear as to the type of housing product with which they are dealing.

Section 145.34 (relating to housing components) has been amended to reflect the current industry terminology for structural insulated panel which in the past was referred to as a sandwich panel.

Section 145.41(c) (relating to adoption of standards) has been amended to eliminate the need for duplicative paper work. By addressing floor insulation in the Site Installation Inspection Report Form (§ 145.91(e)), the Assignment of Responsibility Form is no longer needed and eliminates a redundant paperwork burden from the manufacturers.

Section 145.47 (relating to acquisition of adoption codes and amendments) has been amended to correct the address for the International Code Council; eliminate the reference to BOCA and CABO as these organizations no longer exist; and include information for the Pennsylvania Housing Research/Resource Center.

Section 145.54 (relating to building system approval report and summary) has been amended to require the manufacturer to revise the Building System Approval Report monthly if needed. Current regulation requires this report be updated every 2 years, which severely undermines the ability to effectively monitor the quality process at the manufacturing facility.

Sections 145.60 and 145.61 (relating to insignia of certification; and insignia of inspection agencies) have been revised to reflect the current industry practice of placing required insignias of certification and inspection agency insignias under the kitchen sink.

Section 145.62 (relating to data plates) has been amended to require the applicable code and edition be included on the data plate. This will correct an omission from the current regulations as this information is always provided by the industry as a practical matter in spite of the omission in the regulations.

Section 145.63 (relating to procedures for requesting, controlling and attaching insignia of certification) has been revised to allow for electronic reporting to the Department and to achieve consistency with the reporting process established by other states.

Section 145.72(a) (relating to frequency of inspections) has been amended to provide clarity to the current factory certification process which is confusing and as a result misapplied. The revised process is consistent with the process used by other states. Additionally, the requirement for periodic inspection for storage and transportation methods and facilities has been clarified to require a monthly inspection.

Section 145.78(e) (relating to contractual arrangements) has been added to require a factory to seek approval from the Department prior to changing from one third-party agency to another. This will allow third-party agencies who provide inspection and evaluation services to the factories, to operate free from fear of losing a client as a result of enforcing this proposed rulemaking.

Section 145.82 has been amended to require the Notice of Approval (see § 145.1) be included with the other documentation needed to receive a building permit from the local enforcement agency. This Notice of Approval is similar to notices required by our neighboring states and serves to eliminate confusion regarding the type of housing being installed.

Section 145.91 has been amended to allow for electronic submission of the Site Installation Inspection Report Form and require that manufacturer receive this form as opposed to the inspection agency. The inspection agency

has no relationship with the person installing the industrialized home and as a result compliance with this requirement was weak.

Section 145.94 has been amended to recognize the industrialized housing components are more logically addressed as projects as opposed to individual pieces.

Fiscal Impact

No fiscal impact to the Commonwealth, political subdivisions and the public.

Paperwork

The proposed rulemaking does not impose new or different paperwork requirements. The Assignment of Responsibility Form that was required prior to shipment of every industrialized home is no longer required. Insignia reporting, which all agreed was cumbersome and confusing, has been streamlined consistent with the reporting required by other states. The existing requirement for the Site Installation Inspection Report Form to be submitted to the third-party agencies was unenforceable. The new requirement, that the form be returned to the manufacturer, is more logical and adds value to the process.

Regulatory Review

Under section 5(a) of the Regulatory Review Act (71 P. S. § 745.5(a)), the agency submitted a copy of this proposed rulemaking on July 20, 2009, to the Independent Regulatory Review Commission (IRRC), the Chairperson of the House Urban Affairs Committee and the Chairperson of the Senate Community, Economic and Recreational Development Committee (Committees). In addition to submitting the proposed rulemaking, the agency has provided IRRC and the Committees with a copy of a detailed Regulatory Analysis Form prepared by the agency in compliance with Executive Order 1982-2, "Improving Government Regulations." A copy of this material is available to the public upon request.

If IRRC has any objections to any portion of the proposed rulemaking, it will notify the agency by August 31, 2009. The notification shall specify the regulatory review criteria which have not been met by that portion. The Regulatory Review Act specifies detailed procedures for review, prior to final publication of the regulations, by the agency, the General Assembly and the Governor of objections raised.

Effective Date / Sunset Date

(a) The regulations will become effective by August 31, 2009.

(b) This proposed rulemaking is monitored on a regular basis and updated as needed

Contact Person

Interested persons are invited to submit in writing, by August 31, 2009, any comments, suggestions or objections regarding the proposed regulation to Mark Conte, Chief, Housing Standards Division, Department of Community and Economic Development, Commonwealth Keystone Building, 400 North Street, 4th Floor, Harrisburg, PA 17120, (717) 720-7416.

The data plate must contain sufficient space to permit the attachment of insignia of certification as provided in § 145.60(a) (relating to insignia of certification) and of the label, seal or other insignia of the inspection agency as provided in § 145.61(a) (relating to insignia of inspection agencies). The data plate must contain, but not be limited to, the following information:

* * * * *

(16) Applicable codes, including name of code, edition or year of publication.

* * * * *

§ 145.63. Procedures for requesting, controlling and attaching insignia of certification.

* * * * *

(b) The manufacturer shall entrust the custody of the insignia of certification received from the Department only to [employees] employees designated in the compliance control program as responsible for the custody and control of the insignia of certification. The manufacturer shall attach the insignia to dwelling units of industrialized housing or to housing components only in the circumstances prescribed in the compliance control program and only with the prior specific authorization from the inspection agency. The manufacturer shall attach the insignia of certification in the manner specified by the Department intended to assure that the insignia cannot be removed without destroying the insignia. THIRD-PARTY AGENCIES

§ 145.72a. Frequency of inspections.

(a) In carrying out its monitoring responsibilities under § 145.72[(1) and (2)] (relating to responsibilities of inspection agencies), an inspection agency shall observe the following minimum frequency of inspection requirements: [for factory inspections when the inspection agency label is being attached to every dwelling unit produced in the factory:

(1) The inspection agency shall inspect each major subsystem of each unit produced by the factory during its start-up period or during the inspection agency's initial work at the factory.

(2) At any time after a minimum of ten complete units have been inspected as required by paragraph (1), the inspection agency may reduce the frequency of inspection, but not to less than a 20% frequency of inspection level. A "20% frequency of inspection" means that the inspection agency will

DEPARTMENT OF PUBLIC WELFARE

[55 PA. CODE CHS. 1187 AND 1189] Nonpublic and County Nursing Facilities

Statutory Authority

Notice is hereby given that the Department of Public Welfare (Department) under the authority of the Public Welfare Code (62 P. S. §§ 201(2), 206(2), 403(b) and 443.1) as amended by the act of July 4, 2008 (Act 44) (62 P. S. § 443.1(7)) intends to amend the regulations as set forth in Annex A.

Purpose of Rulemaking

The purpose of this proposed rulemaking is to amend the payment methodology for Medical Assistance (MA) nursing facility services as directed by Act 44 and to make other revisions to streamline and simplify rate-setting for nonpublic nursing facilities and to eliminate obsolete regulatory provisions.

Requirements

The following is a summary of the specific provisions in the proposed rulemaking under Act 44 revisions:

1. Phase-out of county costs in nonpublic nursing facility rate setting—§§ 1187.96, 1187.97 and 1187.98 (relating to price- and rate-setting computations; rates for new nursing facilities with a change of ownership, reorganized nursing facilities and former prospective payment nursing facilities; and phase-out median determination).

Effective January 1, 1996, the Department began setting payment rates for both county and nonpublic MA nursing facility providers using the case-mix payment methodology in Chapter 1187 (relating to nursing facility services). Under the case-mix payment methodology, nursing facilities, other than special rehabilitation facilities and hospital-based nursing facilities, are classified into peer groups based upon their size and geographic loca-

tion. The MA audited allowable costs of the facilities in the peer group are used to establish prices for the net operating components of the facilities' case-mix per diem rates. The prices are used to cap the net operating rates components.

Beginning July 1, 2006, the Department established a new payment methodology for county nursing facility providers, which is based on the counties' certified public expenditures to provide nursing facility services to MA recipients. In establishing this separate payment methodology, the Department recognized that the county nursing facilities' MA audited allowable costs would no longer be included in the rate-setting database used to calculate peer group prices for nonpublic facilities, and that as a result the rates for these facilities could decline. To mitigate any adverse impacts of this change on nonpublic nursing facilities, the Department adopted amendments to Chapter 1187 authorizing the continued use of county costs in the rate-setting process for nonpublic nursing facilities for a 2-year period, which ended June 30, 2008.

Act 44 directs the Department to include county costs in calculating rates for nonpublic nursing facilities for an additional rate year, and to propose regulations to phase-out the use of county costs over a 3-year period beginning July 1, 2009, and ending June 30, 2012. To comply with Act 44, the Department is proposing to revise the rate-setting methodology in §§ 1187.96, and 1187.98, and to make a related change to § 1187.97.

The Department is proposing to revise § 1187.96 to specify that it will use phase-out medians, as determined in accordance with § 1187.98 to set prices for the net operating cost centers (resident care, other resident related and administrative) for each peer group that contains a county nursing facility for the 3-year phase out period, rate years 2009-2010, 2010-2011 and 2011-2012.

The Department is proposing to revise § 1187.98 to specify how phase-out medians will be calculated for the 3-year phase-out period. Under the proposed revisions, the Department will continue to include county nursing facilities in determining peer groups in accordance with § 1187.94(1) (relating to peer grouping for price setting) for rate years 2009-2010, 2010-2011 and 2011-2012. Once peer groups have been determined, the Department will calculate an interim median by adding each county nursing facility's costs from the three most recent audited cost reports to a noncollapsed peer group based on bed size and MSA group. The Department will then calculate the phase-out median as follows:

For rate year 2009-2010, the phase-out median will equal 75% of the interim median plus 25% of the median calculated in accordance with § 1187.96.

For rate year 2010-2011, the phase-out median will equal 50% of the interim median plus 50% of the median calculated in accordance with § 1187.96.

For rate year 2011-2012, the phase-out median will equal 25% of the interim median plus 75% of the median calculated in accordance with § 1187.96.

For rate year 2012-2013 and thereafter, county nursing facility MA allowable costs will not be used in the rate-setting process for nonpublic nursing facilities.

The 3-year phase-out of the use of county nursing facility costs should provide a transition period for nonpublic nursing facilities to adjust their business practices accordingly.

In addition to providing authority for calculation and use of phase-out medians, the Department is proposing to

make a related change to § 1187.97 to extend application of this provision, which specifies how payments for county nursing facilities that privatize are calculated, to coincide with the phase-out of the county nursing facility costs in setting nonpublic nursing facility payment rates.

2. Bed hold day, otherwise referred to as a hospital reserved bed day—§§ 1187.97 and 1187.104 and 1189.103 (regarding limitations on payment for reserved beds).

Currently, the Department pays nonpublic and county nursing facilities a maximum of 15 consecutive reserved bed days per hospitalization to hold a bed for a resident who requires hospitalization. The payment is made at a rate of 1/3 of the nursing facility's per diem rate on file with the Department at the time of the hospitalization, and is paid regardless of the nursing facility's overall total occupancy rate.

Act 44 directs the Department to propose regulations to establish minimum occupancy requirements as a condition for MA nonpublic and county nursing facilities to receive reserved bed day payments for MA residents, and to phase-in the use of these requirements over a period of 2 rate years beginning July 1, 2009, and ending June 30, 2011. To comply with Act 44, the Department is proposing to revise the rate-setting methodology in §§ 1187.97, 1187.104 and 1189.103 as follows:

Beginning July 1, 2009, and ending June 30, 2010, the Department is proposing to amend §§ 1187.104 and 1189.103 to specify that it will only pay a nonpublic or county MA nursing facility for a hospital reserved bed day if the facility's overall total occupancy for the applicable picture date is equal to or greater than 75%. Beginning July 1, 2010, and thereafter, the Department is proposing to pay a facility for a hospital reserved bed day only if the facility's overall total occupancy for the applicable picture date is equal to or greater than 85%. The Department is also proposing to amend §§ 1187.97 and 1189.103 to exempt a new nursing facility from these occupancy requirements until CMI Reports for the three picture dates used to calculate overall occupancy are available for the rate quarter.

The intent of these proposed changes is to ensure that MA recipients continue to receive access to medically necessary nursing facility services while encouraging nursing facility efficiency and economy associated with nursing facility occupancy levels.

Other revisions:

1. Fixed property component of a nonpublic nursing facility's capital rate—§§ 1187.2, 1187.51, 1187.57, 1187.91, 1187.96 and 1187.112.

Currently under the case-mix payment system, the Department annually computes a facility-specific capital rate for each nursing facility. The nursing facility's capital rate consists of a fixed property component, a movable property component, and a real estate tax component. The fixed property component is based on the fair rental value of the nursing facility's fixed property which is determined by an appraisal completed by an independent appraisal firm under contract with the Department. The nursing facility's fair rental value is adjusted by the appraised depreciated replacement cost of the nursing facility's fixed property to account for the per bed limitation of \$26,000 and the bed moratorium provision contained in § 1187.113 (relating to capital component payment limitation). The adjusted amount is then multiplied by the financial yield rate.

For Fiscal Year (FY) 2008-2009, only six of the 595 nonpublic nursing facilities participating in the MA pro-

gram were appraised at a fair rental value under \$26,000. Therefore, the Department determined that to continue the use of an appraisal process in the establishing of a nonpublic nursing facility's fixed property component of their capital rate is unnecessarily burdensome and costly. Beginning in FY 2009-2010, the Department is proposing to amend §§ 1187.51, 1187.57, 1187.91 and 1187.96 to eliminate references to the use of appraisals in the establishment of the fixed property component of a nonpublic nursing facility's capital rate, and to specify instead that the fixed property component of a nonpublic nursing facility's capital rate will be based on the number of MA allowable beds multiplied by an assigned per bed cost of \$26,000. The result of this calculation will then be multiplied by the financial yield rate. The Department will also add a new definition of "allowable bed" to § 1187.2 (relating to definitions).

The elimination of the use of appraisals in the establishment of the fixed property component of a nonpublic nursing facility's capital rate will make certain terms and other provisions of Chapter 1187 obsolete. Specifically, the terms, "appraisal," "bed cost limitation," "FRV-fair rental value," "initial appraisal," "limited appraisal," "movable property appraisal," "reappraisal" and "updated appraisal" will no longer be used in the payment methodology. In addition, because all allowable beds will be assigned a fixed value of \$26,000, the cost per bed maximum limitation in § 1187.112 (relating to cost per bed limitation adjustment) will be obsolete. Therefore, the Department is proposing to remove these definitions from § 1187.2, and rescind § 1187.112 in its entirety.

2. Obsolete moveable property provisions—§§ 1187.57, 1187.91, 1187.96 and 1187.97.

The Department is also proposing to delete the major movable property provisions that relate to cost report periods prior to January 1, 2001, contained in §§ 1187.57, 1187.91, 1187.96 and 1187.97. All nursing facility cost reports contained in the database used for rate setting are for a period beginning after January 1, 2001; therefore, the provisions related to the cost report periods prior to January 1, 2001, are obsolete. This deletion does not change the method used by the Department to determine a nonpublic nursing facility's major movable component of their capital rate. In accordance with current regulation, a nonpublic nursing facility's major movable property component will be based on the nursing facility's audited cost of major movable property. Each nursing facility shall report the acquisition cost of all major movable property on the major movable property line of its MA-11 and shall report the cost of minor movable property and the cost of supplies as net operating costs in accordance with § 1187.51 (relating to scope) and instructions for the MA-11.

Affected Individuals and Organizations

This proposed rulemaking will affect all nonpublic and county nursing facilities enrolled in the MA Program.

Accomplishments and Benefits

This proposed rulemaking will benefit this Commonwealth's MA nursing facility residents by assuring they will continue to have access to medically necessary nursing facility services while providing for reasonable and adequate payments to MA nursing facility providers consistent with the fiscal resources of this Commonwealth.

Fiscal Impact

No fiscal impact is anticipated as a result of these changes through June 30, 2011.

Paperwork Requirements

There are no new or additional paperwork requirements.

Effective Date

The proposed effective date for the proposed rulemaking is July 1, 2009.

Subchapter E. ALLOWABLE PROGRAM COSTS AND POLICIES

§ 1187.51. Scope.

* * * * *

(e) Within the limits of this subchapter, allowable costs for purposes of cost reporting include those costs necessary to provide nursing facility services. These may include costs related to the following:

* * * * *

(4) *Capital costs.*

(i) [Fair rental value] Assigned cost of fixed property.

(ii) [Movable] Acquisition cost of major movable property.

[(A) When the nursing facility's most recent audited MA-11 cost report available in the NIS database for rate setting is for a cost report period beginning prior to January 1, 2001, the fair rental value of major and minor movable property.

(B) When the nursing facility's most recent audited MA-11 cost report available in the NIS database for rate setting is for a cost report period beginning on or after January 1, 2001, the audited acquisition cost of major movable property.]

* * * * *

§ 1187.57. Selected capital cost policies.

The Department will establish a prospective facility-specific capital rate annually for each nursing facility. That rate will consist of three components: the fixed property component, the movable property component and the real estate tax component.

(1) *Fixed property component.*

[(i) The Department will base the nursing facility's fixed property component on the depreciated replacement cost of the nursing facility's fixed property and the associated financial yield rate.

(ii) On an annual basis, the Department will determine the depreciated replacement cost of each nursing facility's fixed property as of March 31, and will use that determination in setting the fixed property component for the rate year beginning on the following July 1.

(iii) The basis for the Department's determination of the depreciated replacement cost of the nursing facility's fixed property will be the most recent of the following appraisals, as modified by any limited appraisals, as of March 31:

(vi) In situations where neither an initial appraisal nor a reappraisal has been done within the 12-month period preceding March 31, the depreciated replacement cost will be based upon an updated appraisal.

(vii) A limited appraisal will be conducted if the nursing facility notifies the Department that a limited appraisal is needed. For the results of a limited appraisal to be included in the determination of a nursing facility's fixed property component for the next rate year, a limited appraisal must be requested by the nursing facility by January 31 of the preceding rate year.

(viii) The depreciated replacement cost of the nursing facility's fixed property is subject to the cost per bed limitation in § 1187.112 (relating to cost per bed limitation adjustment) and, if applicable, the bed moratorium limitation in § 1187.113 (relating to capital component payment limitation).

(ix) The cost to purchase, construct or renovate the fixed property of the nursing facility will not be a factor in determining the appraised depreciated replacement cost.

(2) *Movable property component.*

(i) [When the nursing facility's most recent audited MA-11 cost report available in the NIS database for rate setting is for a cost report period beginning prior to January 1, 2001, the Department will determine the movable property component of each nursing facility's capital rate as follows:

(B) On an annual basis, the Department will determine the depreciated replacement cost of each nursing facility's movable property as of March 31, and will use that determination in setting the movable property component for the rate year beginning on the following July 1.

(C) The Department will base the determination of the depreciated replacement cost of each nursing facility's movable property on a movable property appraisal.

(D) When there is a change in nursing facility ownership, the new nursing facility owner is

deemed to have the same appraised depreciated replacement cost as the former owner.

(ii) When the nursing facility's most recent audited MA-11 cost report available in the NIS database for rate setting is for a cost report period beginning on or after January 1, 2001, the] The Department will determine the movable property component of each nursing facility's capital rate as follows:

[(A)] (i) The Department will base the nursing facility's movable property component on the nursing facility's audited cost of major movable property, as set forth in that MA-11.

[(B)] (ii) Each nursing facility shall report the acquisition cost of all major movable property on the major movable property line of its MA-11 and shall report the cost of minor movable property and the cost of supplies as net operating costs in accordance with § 1187.51 (relating to scope) and instructions for the MA-11.

(d) Using the NIS database in accordance with this subsection and § 1187.91, the Department will set a rate for the capital cost category for each nursing facility by adding the nursing facility's fixed property component, movable property component and real estate tax component and dividing the sum of the three components by the nursing facility's total actual resident days, adjusted to 90% occupancy, if applicable.

(1) The Department will determine the fixed property component of each nursing facility's capital rate as follows:

(i) The Department will [**adjust the appraised depreciated replacement cost of the nursing facility's fixed property to account for the per bed limitation in § 1187.112 (relating to cost per bed limitation adjustment) and the bed moratorium addressed in § 1187.113 (relating to capital component payment limitation)**] **multiply the total number of the nursing facility's allowable beds as of April 1, immediately preceding the rate year, by \$26,000 to determine the nursing facility's allowable fixed property cost.**

(ii) The Department will multiply the [**adjusted depreciated replacement costs of the fixed property**]

result by the financial yield rate. [to determine the fair rental value for the nursing facility's fixed property.]

(iii) The nursing facility's fixed property component will equal the fair rental value of its fixed property.]

(2) The Department will determine the movable property component of each nursing facility's capital rate [as follows:

(i) When the nursing facility's most recent audited MA-11 cost report available in the NIS database for rate setting is for a cost report period beginning prior to January 1, 2001:

(A) The Department will multiply the depreciated replacement costs of the movable property by the financial yield rate to determine the fair rental value for the nursing facility's movable property.

(B) The nursing facility's movable property component will equal the fair rental value of its movable property.

(ii) When the nursing facility's most recent audited MA-11 cost report available in the NIS database for rate setting is for a cost report period beginning on or after January 1, 2001, the amount of the movable property component will be] based [upon] on the audited actual costs of major movable property as set forth in the most recent audited MA-11 cost report available in the NIS database in accordance with § 1187.91(a)(ii). This amount is referred to as the nursing facility's [most recent] allowable movable property cost.

§ 1187.97. Rates for new nursing facilities, nursing facilities with a change of ownership, reorganized nursing facilities and former prospective payment nursing facilities.

The Department will establish rates for new nursing facilities, nursing facilities with a change of ownership, reorganized nursing facilities and former prospective payment nursing facilities as follows:

(1) *New nursing facilities.*

* * * * *

(ii) [For nursing facilities enrolled in the MA Program prior to January 1, 2001, the three components of the capital portion of the case-mix rate are determined as follows:

(A) The fixed property component will be determined in accordance with § 1187.96(d)(1) (relating to price and rate setting computations).

(B) The movable property component will be determined in accordance with § 1187.96(d)(2).

(C) The real estate tax cost component will be determined based on the audited actual real estate tax cost.

(iii) For nursing facilities enrolled in the MA Program on or after January 1, 2001, the] The three components of the capital portion of the case-mix rate are determined as follows:

* * * * *

(B) *Movable property component.* The movable property component will be determined as follows:

(I) The nursing facility's acquisition cost, as determined in accordance with § 1187.61(b) (relating to movable property cost policies), for any new items of movable property acquired on or before the date of enrollment in the MA program, will be added to the nursing facility's remaining book value for any used movable property as of the date of enrollment in the MA program to arrive at the nursing facility's movable property cost. [If the nursing facility does not have a depreciation schedule for its used movable property, the allowable cost for those items will be the depreciated replacement cost as determined by qualified personnel of the Department's independent appraisal contractor.]

* * * * *

[(iv)] (iii) Newly constructed nursing facilities are exempt from the adjustment to 90% occupancy until the nursing facility has participated in the MA Program for one full annual price setting period as described in § 1187.95 (relating to general principles for rate and price setting).

(iv) A new nursing facility is exempt from the occupancy requirements in § 1187.104 (1)(ii) (relating to limitations on payment for reserved beds) until a CMI Report for each of the three picture dates used to calculate overall occupancy as set forth in § 1187.104(1)(iii) is available for the rate quarter.

(2) *Nursing facilities with a change of ownership and reorganized nursing facilities.*

(i) *New provider.* The new nursing facility provider will be paid exactly as the old nursing facility provider, except that, if a county nursing facility becomes a nursing facility between July 1, 2006, and June 30, [2008] 2012, the per diem rate for the nursing facility will be computed in accordance with § 1187.96, using the data contained in the NIS database. Net operating and capital rates for the old nursing facility provider will be assigned to the new nursing facility provider.

* * * * *

§ 1187.98. Phase-out median determination.

(a) For rate years, 2006-2007 and 2007-2008, the Department will determine a phase-out median for each net operating cost center for each peer group to calculate a peer group price. The Department will establish the phase-out median as follows:

* * * * *

(b) For rate years, 2009-2010, 2010-2011 and 2011-2012, the Department will determine a phase-out median for each net operating cost center for each peer group to calculate a peer group price. The Department will establish the phase-out median as follows:

(1) The Department will establish an interim phase out median for the rate year as specified in subsection (a).

(2) The phase-out median for the 2009-2010 rate year will equal 75% of the interim median calculated in accordance with paragraph (1) plus 25% of the median calculated in accordance with § 1187.96.

(3) The phase-out median for the 2010-2011 rate year will equal 50% of the interim median calculated in accordance with paragraph (1) plus 50% of the median calculated in accordance with § 1187.96.

(4) The phase-out median for the 2011-2012 rate year will equal 25% of the interim median calculated in accordance with paragraph (1) plus 75% of the median calculated in accordance with § 1187.96.

(c) For the rate year, 2012-2013 and thereafter, county nursing facility MA allowable costs will not be used in the rate-setting process for nonpublic nursing facilities.

Subchapter H. PAYMENT CONDITIONS, LIMITATIONS AND ADJUSTMENTS

§ 1187.104. Limitations on payment for reserved beds.

(a) The Department will make payment to a nursing facility for a reserved bed when the resident is absent from the nursing facility for a continuous 24-hour period because of hospitalization or therapeutic leave **subject to the limits in subsection (b)**. A nursing facility shall record each reserved bed for therapeutic leave on the nursing facility's daily census record and MA invoice. When the bed reserved for a resident who is hospitalized is temporarily occupied by another resident, a nursing facility shall record the occupied bed on the nursing facility's daily MA census record and the MA invoice. During the reserved bed period, the same bed shall be available for the resident upon the resident's return to the nursing facility. [**The following limits on payment for reserved bed days apply:**]

(b) The payment for reserved bed days is subject to the following limits:

(1) Hospitalization.

(i) A resident receiving nursing facility services is eligible for a maximum of 15 consecutive reserved bed days per hospitalization. The Department will pay a nursing facility at a rate of 1/3 of the nursing facility's current per diem rate on file with the Department for a hospital reserved bed day **if the nursing facility meets the overall occupancy requirements of subparagraphs (ii)**.

(ii) [**If the resident's hospital stay exceeds the Department's 15 reserved bed day payment limitation, the nursing facility shall readmit the resident to the nursing facility upon the first availability of a bed in the nursing facility if, at the time of readmission, the resident requires the services provided by the nursing facility.**] A nursing facility's overall occupancy rate shall equal or exceed the following:

(A) During the rate year 2009-2010, the nursing facility's overall occupancy rate for the rate quarter in which the hospital reserved bed day occurs must equal or exceed 75%.

(B) Beginning with the rate year 2010-2011 and thereafter, the nursing facility's overall occupancy rate for the rate quarter in which the hospital reserved bed day occurs must equal or exceed 85%.

(iii) [**Hospital reserved bed days may not be billed as therapeutic leave days.**] The Department will calculate a nursing facility's overall occupancy rate for a rate quarter as follows:

(A) The Department will identify the picture date for the rate quarter as specified in § 1187.96(a)(5) (relating to price-and rate-setting computations) and the two picture dates immediately preceding this picture date.

(B) The Department will calculate the nursing facility's occupancy rate for each of the picture dates identified in clause (A) by dividing the total number of assessments listed in the facility's CMI report for that picture date by the number of the facility's certified beds on file with the Department on the picture date and multiplying the result by 100%. The Department will assign the highest of the three picture date occupancy rates as the nursing facility's overall occupancy rate for the rate quarter.

(C) The Department will only use information contained on a valid CMI report to calculate a nursing facility's overall occupancy rate. If a nursing facility did not submit a valid CMI report for a picture date identified in clause (A), the Department will calculate the nursing facility's overall occupancy rate based upon the valid CMI reports that are available for the identified picture dates. If no valid CMI reports are available for the picture dates identified in clause (A), the nursing facility is not eligible to receive payment for hospital reserve bed days in the rate quarter.

(D) For purposes of this subsection, a valid CMI report is a CMI report that meets the requirements of § 1187.33(a)(5) and (6) (relating to resident data and picture date reporting requirements).

(iv) If the resident's hospital stay exceeds the Department's 15 reserved bed day payment limitation, the nursing facility shall readmit the resident to the nursing facility upon the first availability of a bed in the nursing facility if, at the time of readmission, the resident requires the services provided by the nursing facility.

(v) Hospital reserved bed days may not be billed as therapeutic leave days.

* * * * *

§ 1187.112. [Cost per bed limitation adjustment] (Reserved).

(Editor's Note: The Department is proposing to delete the text of 1187.112 as it currently appears in the *Pennsylvania Code* pages 1187-52.15 and 1187-52.16 (serial pages (320661) and (320662)).)

CHAPTER 1189. COUNTY NURSING FACILITY SERVICES

§ 1189.103. Limitations on payment for reserved beds.

(a) [**The Department will make payment to a county nursing facility**] A county facility may be eligible for payments for a reserved bed when the resident is absent from the nursing facility for a continuous 24-hour period because of hospitalization or therapeutic leave. A county nursing facility shall record each reserved bed for therapeutic leave on the nursing facility's daily census record and MA invoice. When the bed reserved for a resident who is hospitalized is temporarily occupied by another resident, a county nursing facility shall record the occupied bed on the nursing facility's daily MA census record and the MA invoice. During the reserved bed period the same bed shall be available for the resident upon the resident's return to the nursing facility.

(b) The following limits on payment for reserved bed days apply:

(1) *Hospitalization.*

* * * * *

(ii) A county nursing facility's overall occupancy must meet the occupancy requirements in this subparagraph. For each rate quarter, the criteria for meeting the overall occupancy limits will be calculated and applied to the rate quarter based on the highest of the overall occupancy calculated for three picture dates. The three picture dates will be the picture date for the current rate quarter (July 1 rate quarter—February 1 picture date; October 1 rate quarter—May 1 picture date; January 1 rate quarter—August 1 picture date; and April 1 rate quarter—November 1 picture date) and the two picture dates directly preceding this picture date. Overall occupancy for each picture date will be calculated by dividing the total number of assessments listed in the facility's CMI report for the picture date by the number of the facility's certified beds on file with the Department on the picture date. The highest of the results will be used to determine whether the county nursing facility meets the overall occupancy criteria set forth as follows:

(A) During rate year 2009-2010, the county nursing facility's overall occupancy rate for the rate quarter in which the hospital reserved bed day occurred must be equal or exceed 75%.

(B) Beginning with rate year 2010-2011 and thereafter, the county nursing facility's overall occupancy rate for the rate quarter in which the hospital reserved bed day occurs must equal or exceed 85%.

(iii) County nursing facilities not submitting a valid CMI report for the three picture dates do not meet the criteria for payment for reserved bed days, unless subparagraph (iv) applies.

(iv) New county nursing facilities are eligible for payment for reserved bed days as set forth in subparagraph (i) until CMI Reports for the three picture dates used to calculate overall occupancy as set forth in subparagraph (ii) are available for the rate quarter.

(v) If the resident's hospital stay exceeds the Department's 15 reserved bed days payment limitation, the county nursing facility shall readmit the resident to the nursing facility upon the first availability of a bed in the county nursing facility if, at the time of readmission, the resident requires the services provided by the county nursing facility.

[(iii)] (vi) Hospital reserved bed days may not be billed as therapeutic leave days.

DEPARTMENT OF TRANSPORTATION

[67 PA. CODE CH. 233]

Transportation Enhancement Grants from Automated Red Light Enforcement System Revenues

The Department of Transportation (Department), Bureau of Highway Safety and Traffic Engineering, under 75 Pa.C.S. § 3116 (relating to automated red light enforcement systems in first class cities) proposes to add Chapter 233 (relating to transportation enhancement grants from automated red light enforcement system revenues) as set forth in Annex A.

Purpose of this Chapter

The purpose of this chapter is to implement 75 Pa.C.S. § 3116(l)(2) which requires the Department to develop, by regulation, a Transportation Enhancements Grant Program (Program) for the use of revenue generated from automated red light enforcement systems.

Purpose of this Proposed Rulemaking

The purpose of this proposed rulemaking is to prescribe how the Department will administer the Program for the use of revenue generated from automated red light enforcement systems, under 75 Pa.C.S. § 3116(l)(2).

The Program will be funded by revenues generated from fines paid by violators of 75 Pa.C.S. § 3112(a)(3), where the enforcement mechanism is approved automated red light enforcement systems located at signalized intersections approved by the Department.

At the present time, 75 Pa.C.S. § 3116 only provides legal authority to implement automated red light enforcement systems within the City of Philadelphia (City), and it designates the Philadelphia Parking Authority as the "system administrator."

Section 3116(l)(2) of the Vehicle Code allows the system administrator to deduct automated red light enforcement program operation and maintenance costs from fine revenue before remitting the balance to the Department for deposit into the Motor License Fund.

The proposed rulemaking is written so they will still apply if the 75 Pa.C.S. (relating to Vehicle Code) is amended in the future to permit automated red light enforcement systems in other Commonwealth jurisdictions beyond the City.

Summary of Significant Provisions

The definitions of local authorities and sponsor in § 233.2 (relating to definitions) and the information in § 233.5 (relating to application procedure) indicate that local authorities (county, municipal, and other local boards or bodies having authority to enact laws relating to traffic), metropolitan planning organizations, rural planning organizations, county planning organizations, or Commonwealth agencies would be eligible to apply for a transportation enhancement grant from automated red light enforcement system revenues.

Section 233.3 (relating to eligibility requirements and criteria) indicates that all worthwhile projects that involve improvements to highway safety or mobility may be considered, with the exception of transportation impact studies and highway improvements that are the responsibility of the applicant for a Department Highway Occupancy Permit.

Section 233.4 (relating to limits of funding) provides that grants may cover the entire cost of an eligible project, so matching funds are not required. Grants may also be used for a portion of a larger project if other funding sources are secured.

Section 233.5 describes the application procedure and required information.

Section 233.6 (relating to deadline for applications) establishes an annual grant application period from June 1—30.

The criteria to be used in the review of grant applications are set forth in § 233.8 (relating to grant selection process and criteria). A debriefing would be available for unsuccessful applicants upon request.

Provisions pertaining to offers and acceptance of a grant, standards and special conditions, audits and recordkeeping, inspections, and payment procedures are addressed in §§ 233.9—233.13 respectively.

Persons and Entities Affected

This proposed rulemaking affects various entities involved with the current automated red light enforcement program within the City. These include the City, which is the only permissible host community for automated red light enforcement based on the enabling legislation; the Philadelphia Parking Authority, which is the designated system administrator in the enabling legislation; and the Traffic Engineering Division of the City of Philadelphia, Department of Streets, which owns, operates and maintains the traffic signals at which automated red light enforcement systems are installed within the City.

Other affected entities are sponsors that choose to apply for, or receive, a transportation enhancement grant under the provisions of the proposed regulations. These include local authorities (county, municipal and other local boards or bodies having authority to enact laws relating to traffic), metropolitan planning organizations, rural planning organizations, county planning organizations or Commonwealth agencies.

The Department is certainly affected since it will be administering the Program established by the proposed rulemaking. Section 3116 of the Vehicle Code defines various other Department roles and responsibilities related to the automated red light enforcement program. The Department is also affected by virtue of the fact that most of the automated red light enforcement system equipment is installed on State-designated highways.

In the future, other local authorities would be affected if the Vehicle Code is amended to permit automated red light enforcement systems in other Commonwealth jurisdictions beyond the City.

Fiscal Impact

The proposed rulemaking will not require the expenditure of additional funds by the Commonwealth or any other entity. The revenue for the Program comes from the collection of fines from red light running violators. Almost all of these violations would not have been detected without the automated system or a large, ongoing expenditure to provide significant police presence for expanded, conventional enforcement efforts.

The Program provides an additional revenue source to fund worthwhile projects. While entities must compete for a grant through an application process, entities are not compelled to apply for grants, nor are matching funds required. Grants can also be used for a portion of a larger project if other funding sources are secured.

Entities seeking a grant would need to prepare a grant application. The recordkeeping and payment procedures prescribed in the proposed rulemakings would need to be followed by entities that accept a grant offer from the Department.

The Department would have various program administration and oversight duties. These include the review of grant applications, the selection of projects to be funded by means of grants, grant agreement processing, reviews of submissions, project reviews and inspections and related activities.

Regulatory Review

Under section 5(a) of the Regulatory Review Act (71 P. S. § 745.5(a)), on July 21, 2009, the agency submitted a copy of this proposed rulemaking on July 21, 2009, to the Independent Regulatory Review Commission (IRRC) and to the Chairpersons of the House and Senate Transportation Committees (Committees). In addition to submitting the proposed regulations, the agency has provided IRRC and the Committees with a copy of a detailed Regulatory Analysis Form. A copy of this material is available to the public upon request.

Under section 5(g) of the Regulatory Review Act, IRRC may convey any comments, recommendations or objections to the proposed rulemaking within 30 days of the close of the public comment period. The comments, recommendations or objections shall specify the regulatory review criteria that have not been met. The Regulatory Review Act specifies detailed procedures for review, prior to final publication of the proposed rulemaking, by the Department, the General Assembly and the Governor of comments, recommendations or objections.

Sunset Date

The Department is not establishing a sunset date for this rulemaking, since this rulemaking is needed to administer provisions required under the Vehicle Code. The Department, however, will continue to closely monitor this rulemaking for its effectiveness.

Public Comments

Interested persons are invited to submit written comments, suggestions or objections regarding these proposed regulations to Glenn C. Rowe, P. E., PTOE, Acting Director, Bureau of Highway Safety and Traffic Engineering, Department of Transportation, Commonwealth Keystone Building, 400 North Street, 6th Floor, Harrisburg, PA 17120-0064, within 30 days of publication of this notice in the *Pennsylvania Bulletin*.

This chapter sets forth requirements and criteria relating to transportation enhancement grants from automated red light enforcement system revenues.

§ 233.2. Definitions.

The following words and terms, when used in this chapter, have the following meanings, unless the context clearly indicates otherwise:

Automated red light enforcement system—A vehicle sensor installed to work in conjunction with a traffic-control signal which automatically produces one or more recorded images of a vehicle at the time the vehicle is used or operated in a manner which is a violation under 75 Pa.C.S. § 3112(a)(3) (relating to traffic-control signals).

Department—The Department of Transportation of the Commonwealth.

Director—The Director of the Center for Program Development and Management of the Department.

Grant—An offer of funding assistance from the Department to a sponsor for a project governed by this chapter.

Highway—

(i) The entire width between the boundary lines of every way publicly maintained when any part thereof is open to the use of the public for purposes of vehicular travel.

(ii) The term includes a roadway open to the use of the public for vehicular travel on grounds of a college or university or public or private school or public or historic park.

Local authorities—County, municipal, and other local boards or bodies having authority to enact laws relating to traffic.

Official traffic-control devices—Signs, signals, markings, and devices consistent with 75 Pa.C.S. (relating to Vehicle Code) placed or erected by authority of a public body or official having jurisdiction, for the purpose of regulating, warning or guiding traffic.

Recorded image—An image recorded by an automated red light enforcement system on a photograph, a digital image, or any other image-capture technology.

Secretary—The Secretary of the Department.

Sponsor—A local authority, metropolitan planning organization, rural planning organization, county planning organization, or Commonwealth agency applying for, or receiving, a transportation enhancement grant under this chapter.

Traffic—Pedestrians, ridden or herded animals, vehicles, streetcars, and other conveyances, whether singly or together, using any highway for purposes of travel.

Traffic-control signal—A device, whether manually, electrically or mechanically operated, by which traffic is alternately directed to stop and permitted to proceed.

(i) Every device in, upon, or by which any person or property is or may be transported or drawn upon a highway, except devices used exclusively upon rails or tracks.

(ii) The term does not include a self-propelled wheelchair or an electrical mobility device operated by and designed for the exclusive use of a person with a mobility-related disability.

§ 233.3. Eligibility requirements and criteria.

(a) The minimum requirement for eligibility to apply for a transportation enhancement grant under this chapter is that the project must involve improvement to highway safety and mobility within this Commonwealth.

(b) It is the intent of this grant program to fund worthwhile projects that can be completed at a relatively low cost.

(c) All projects may be considered for a transportation enhancement grant from automated red light enforcement system revenues, with the exception of transportation impact studies and highway improvements that are the responsibility of the applicant for a Department Highway Occupancy Permit.

§ 233.4. Limits of funding.

Grants under this chapter may cover the entire cost of an eligible project, so matching funds are not required. Grants may also be used for a portion of a larger project if other funding sources are secured.

§ 233.5. Application procedure.

(a) A sponsor shall submit a written request in the form of an application to the Director: Attention—Transportation Enhancement Grants from Automated Red Light Enforcement System Revenues.

(b) The application shall be prepared in accordance with instructions provided by the Department. The application must contain sufficient information to enable the Department to complete its evaluation of the proposed project.

(c) An application must set forth, at a minimum, the following information:

(1) *Project description*. Provide a general description of the project and the objectives that are desired to be achieved.

(2) *Project location*. Provide a location map. Clearly identify the beginning and ending points of the project, the associated counties, municipalities, routes, segments

and offsets. Provide a general description of the location of the project and the surrounding area. Indicate roadway type/classification and length of the project in miles. Provide information on annual average daily traffic (AADT), current roadway geometry (number of lanes), speed limits, adjoining land uses, and number/location of signalized intersections.

(3) *Official traffic-control device description.* For projects involving official traffic-control devices, briefly describe the existing official traffic-control devices.

(4) *Project justification.* Outline why the project is being nominated for this grant program and the benefits that would be obtained.

(5) *Potential improvements and cost.* Provide a description of the potential improvements, and their associated estimated costs. Estimated costs should be as detailed and accurate as possible, and include all aspects of the project (design, construction, and the like).

(6) *Schedule.* Provide information that indicates the time frame necessary to complete the project. Indicate whether the project can be completed during 1 year or if it would be a multiyear project.

(7) *Other programmed projects.* Describe other improvement projects that are in the vicinity of the proposed project and have been programmed on the Regional Transportation Improvement Program (include location, time frame, cost, and the like).

(8) *Anticipated development.* Describe known major developments that are anticipated within the next 10 years in the vicinity of the proposed project.

(9) *Professional engineer.* Identify the professional engineer or consulting engineering firm that will provide engineering services for the project.

(10) *Contact person.* Provide the name, address, telephone number and e-mail address of a contact person for the sponsor.

(11) *Other information.* The sponsor shall provide other information that the sponsor believes may justify the project or that is requested by the Department.

(d) The sponsor shall complete the application and submit it before the deadline under § 233.6 (relating to deadline for applications).

§ 233.6. Deadline for applications.

(a) Applications for transportation enhancement grants under this chapter will be considered on an annual basis. From the completed applications on file for a given year, projects will be selected for grants. Applications on file, but incomplete, may be excluded from consideration for grants in that year.

(b) Sponsors may submit a completed application for a transportation enhancement grant under this chapter beginning on June 1 of each year until the close of business on June 30 of that year.

(c) If the deadline for applications occurs on a weekend or legal holiday when Commonwealth offices are closed, the deadline will be the close of the next business day.

(d) The Department may consider applications for transportation enhancement grants under this chapter which may be technically incomplete on the application deadline, but which are made complete in a timely fashion.

§ 233.7. Public records.

An application for a transportation enhancement grant under this chapter will be considered a public record at the time of filing, and will be made available for inspection.

§ 233.8. Grant selection process and criteria.

(a) *Consideration.* Following the closing date for receipt of applications, properly completed applications filed within the application period will be considered for funding during the next fiscal year.

(b) *Additional information.* If it is determined that an application is incomplete and that additional information is necessary, the sponsor shall provide that additional information to allow further consideration of the application.

(c) *Review by Director.* The Director will review and evaluate applications with respect to applicable criteria for project funding, available funds, current priorities for traffic safety and mobility, and other factors.

(d) *Criteria used in review.* In considering an application, the Director will give weight and consideration to the following criteria:

(1) The sponsor's past maintenance and operational history for traffic-control signals, official traffic-control devices, or other items of work that are project components.

(2) The anticipated benefits of the project considering traffic safety benefits, mobility benefits and delay reduction, energy savings and greenhouse gas reductions.

(3) The estimated cost of the project.

(4) The local and regional impact of the project.

(5) The results of similar types of projects that have already been completed.

(6) The results of previous projects completed by the sponsor.

(7) Cost sharing by sponsor or other entities.

(8) Other criteria which the Department determines should be considered.

(e) *Discretion in evaluation.* In consideration of the various criteria applicable to the review of an application, the Department may take into account unique or special factors that may arise in the administration of the grant program.

(f) *Debriefing.* At the request of a sponsor, the Department will conduct a debriefing with a sponsor whose application has been denied.

§ 233.9. Offer and acceptance of a grant.

(a) *Issuance of grant offers.* The Department will, in writing, notify each sponsor who has submitted an application whether or not they will receive a grant offer.

(b) *Grant agreement.* A grant offer issued to a sponsor will describe any specific grant conditions and include the conditions as terms in the accompanying grant agreement.

(c) *Grant conditions.* The Department may or may not fully fund the entire cost of the project. The grant agreement will specify the total amount to be funded under the grant offer, the scope of the project, and the items of work to be included. The Department may also require sponsors to conduct before and after studies to determine project effectiveness.

(d) *Acceptance.* A sponsor who has received a grant offer shall, within 30 days indicate, by registered mail, acceptance of the offer.

(1) Acceptance of an offer is not binding on a sponsor until the execution of the grant agreement between the Department and the sponsor.

(2) Failure of a sponsor to indicate acceptance of the terms of an offer within the 30-day response period will be considered as a rejection of the offer and withdrawal of the application.

(e) *Discretion of Department.* Unless otherwise restricted by statute, the Department has absolute discretion in the selection of projects and in the determination of funding levels, priorities, critical project selection criteria, project phasing, project design and specifications, and performance criteria.

(f) *Amendments to projects.* In the consideration of an application, the Department may determine that a proposed project should be amended to accommodate available funding, application traffic design criteria, anticipated use, or to better accommodate potential user needs. The Department may offer a transportation enhancement grant under this chapter for a project whose cost, specifications, terms, or scope have been modified by the Department.

(g) *Consultation does not insure offer.* In the event that the Department confers with a sponsor to amend a proposed project, the sponsor should understand that consultation and amendment does not insure that an offer will be made.

§ 233.10. Standards, methods, techniques, designs, and special conditions.

(a) The Department reserves the right to specify or make determinations as to the standards, methods, techniques, designs and dimensional criteria acceptable in projects funded by transportation enhancement grants under this chapter.

(b) The design and construction of an approved project are subject to the review and approval of the Department, including costs, materials, plans, specifications, and design and operational details.

(c) Failure to meet special conditions, performance criteria, or specifications may result in the withdrawal of the transportation enhancement grant, disqualification from future consideration for a transportation enhancement grant under this chapter, or declaration of a sponsor to be in default of the terms of the grant agreement.

§ 233.11. Audit and recordkeeping.

(a) *General.*

(1) A sponsor receiving a transportation enhancement grant under this chapter shall keep records as the Department may prescribe, including records which fully disclose the amount and the disposition by the sponsor of the grant proceeds, the total cost of the plan or program in connection with which the transportation enhancement grant is given or used, and the amount and nature of that portion of the cost of the plan or program supplied by other sources, as well as records that will facilitate an effective audit.

(2) The Department will have access, for the purpose of audit and examination, to books, documents, papers and records of the sponsor that are pertinent to a transportation enhancement grant issued under this chapter. This includes progress audits during the project.

(3) A sponsor is required to establish and maintain an adequate accounting record for an individual project, which will allow the Department to determine the allowability of costs incurred for the project.

(4) A sponsor shall maintain effective control over and accountability for all funds, property, and other assets. Sponsors shall adequately safeguard assets and assure that they are used solely for authorized purposes.

(5) A sponsor shall establish procedures to minimize the time elapsing between the transfer of funds from the Department and the disbursement by the sponsor whenever funds are advanced by the Department. If this elapsed time exceeds the standards of this chapter, the Department may require the return of interest earned on payments made.

(6) The sponsor shall include, in any contract related to the grant, a clause which allows the Department access to the sponsor's contractor's records for purposes of accounting and audit.

(b) *Retention of records.*

(1) A sponsor shall retain, for 3 years after the date of the submission of the final Department payment, documentary evidence such as invoices, cost estimates, and negotiation documents relating to any item of project cost. These documents include, but are not limited to, vendor's invoices, applicable purchase orders, receiving reports, inventory records, method of pricing, returns, catalog cuts, plans, inspection reports, final inspection report showing acceptance of the project, and a record of disposition or correction of unsatisfactory work.

(2) A sponsor shall retain for 3 years after the date of the submission of the final Department payment, evidence of payments for items of project costs including, but not limited to, vouchers, cancelled checks or warrants and receipts for cash payments.

(3) If audit findings have not been resolved, records shall be retained until the findings have been resolved.

§ 233.12. Inspection.

(a) The Department or an agency of the Commonwealth, or both, or person designated or authorized by the Department has the absolute right to inspect, without notice, the project sites, proposed project sites, records, and construction materials relating to a project funded by a transportation enhancement grant from automated red light enforcement system revenues.

(b) An inspection ordered by the Department or conducted under its authority may include, but not necessarily be limited to, the reproduction and examination of records, the taking of samples applicable to evaluation or project quality control, or the assessment of any factor relevant to a project, application, or contracts and terms related to the process for transportation enhancement grants from automated red light enforcement system revenues.

(c) A sponsor's denial of access to records, failure to produce records, or obstruction with an inspection may result in withdrawal of the transportation enhancement grant and disqualification from future consideration for a transportation enhancement grant under this chapter.

§ 233.13. Payment procedures.

Unless otherwise specified by the Department, the following general procedures are to be used for funds from a transportation enhancement grant under this chapter:

(1) Prior to disbursement of funds, the Department reserves the right to conduct inspections or testing, or to review and audit records or accounts to validate, to the satisfaction of the Department, that disbursement of funds is warranted.

(2) A sponsor, having received payment or partial payment or reimbursement under a transportation enhancement grant under this chapter, shall make payments, within 30 calendar days from receipt of funds, to vendors and contractors for services and materials properly invoiced under the project.

(3) A sponsor shall forward requests for payment to the Department on the forms provided or in a manner specified by the Department. A request must include submission of actual cost documentation, consisting of approved contract estimates of work-in-place, approved invoices or other evidence of incurred costs, satisfactory to the Department. The final 10% of the total payment will not be paid by the sponsor until final inspection and approval of the project by the Department.

(4) Payment requests shall be limited to monthly submissions.

§ 233.14. Liability; forfeiture of funds; repayment.

If a sponsor fails to comply with the terms of a transportation enhancement grant issued under this

chapter, the sponsor shall immediately reimburse the Department the amount for which a demand is made by the Department.

§ 233.15. Waiver.

(a) *Waiver of requirements.* The Department may waive requirements to submit specific maps, reports, plans, information or data normally required for a grant application. The waivers may be granted only after written request to the Director and formal written response to the sponsor by the Director prior to submission of the completed application to the Bureau.

(b) *Special projects procedures.* The Department may develop modified procedures for grant applications pertaining to Department-specified projects funded by transportation enhancement grants under this chapter

§ 233.16. Appeal.

A person aggrieved by a decision of the Department under § 233.14 (relating to liability; forfeiture of funds; repayment) may take an appeal under 2 Pa.C.S. §§ 501—508 and 701—704 (relating to Administrative Agency Law) and 1 Pa. Code Part II (relating to General Rules of Administrative Practice and Procedure).

APPLICATIONS

THE CLEAN STREAMS LAW AND THE FEDERAL CLEAN WATER ACT APPLICATIONS FOR NATIONAL POLLUTION DISCHARGE ELIMINATION SYSTEM (NPDES) PERMITS AND WATER QUALITY MANAGEMENT (WQM) PERMITS

This notice provides information about persons who have applied for a new, amended or renewed NPDES or WQM permit, a permit waiver for certain stormwater discharges or submitted a Notice of Intent (NOI) for coverage under a general permit. The applications concern, but are not limited to, discharges related to industrial, animal or sewage waste, discharges to groundwater, discharges associated with municipal separate storm sewer systems (MS4), stormwater associated with construction activities or concentrated animal feeding operations (CAFOs). This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92 and 40 CFR Part 122, implementing The Clean Streams Law (35 P. S. §§ 691.1—691.1001) and the Federal Clean Water Act.

<i>Location</i>	<i>Permit Authority</i>	<i>Application Type or Category</i>
Section I	NPDES	Renewals
Section II	NPDES	New or amendment
Section III	WQM	Industrial, sewage or animal waste; discharge into groundwater
Section IV	NPDES	MS4 individual permit
Section V	NPDES	MS4 permit waiver
Section VI	NPDES	Individual permit stormwater construction
Section VII	NPDES	NOI for coverage under NPDES general permits

For NPDES renewal applications in Section I, the Department of Environmental Protection (Department) has made a tentative determination to reissue these permits for 5 years subject to effluent limitations and monitoring and reporting requirements in their current permits, with appropriate and necessary updated requirements to reflect new and changed regulations and other requirements.

For applications for new NPDES permits and renewal applications with major changes in Section II, as well as applications for MS4 individual permits and individual stormwater construction permits in Sections IV and VI, the Department, based upon preliminary reviews, has made a tentative determination of proposed effluent limitations and other terms and conditions for the permit applications. These determinations are published as proposed actions for comments prior to taking final actions.

Unless indicated otherwise, the Environmental Protection Agency (EPA) Region III Administrator has waived the right to review or object to proposed NPDES permit actions under the waiver provision in 40 CFR 123.24(d).

Persons wishing to comment on an NPDES application are invited to submit a statement to the regional office noted before an application within 30 days from the date of this public notice. Persons wishing to comment on a WQM permit application are invited to submit a statement to the regional office noted before the application within 15 days from the date of this public notice. Comments received within the respective comment periods will be considered in the final determinations regarding the applications. Comments should include the name, address and number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests for a public hearing on applications. A public hearing may be held if the responsible office considers the public response significant. If a hearing is scheduled, a notice of the hearing will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. The Department will postpone its final determination until after a public hearing is held.

Persons with a disability who require an auxiliary aid, service, including TDD users, or other accommodations to seek additional information should contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995

PREAMBLE 1

Acknowledgment of Notices of Intent to Remediate Submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.908).

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (act) require the

Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. Persons intending to use the Background Standard, Statewide Health Standard, the Site-Specific Standard or who intend to remediate a site as a special industrial area must file a Notice of Intent to Remediate with the Department. A Notice of Intent to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one, a combination of the cleanup standards or who receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for any contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period for sites proposed for remediation using a Site-Specific Standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of the site. For the sites identified, proposed for remediation to a Site-Specific Standard or as a special industrial area, the municipality within which the site is located may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified. During this comment period, the municipality may request that the person identified as the remediator of the site develop and implement a public involvement plan. Requests to be involved and comments should be directed to the remediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office before which the notice appears. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

AIR QUALITY

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

NEW SOURCES AND MODIFICATIONS

The Department of Environmental Protection (Department) has developed an "integrated" plan approval, State operating permit and Title V operating permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the public. This approach allows the owner or operator of a facility to complete and submit all the permitting documents relevant to its application one time, affords an opportunity for public input and provides for sequential issuance of the necessary permits.

The Department has received applications for plan approvals and/or operating permits from the following facilities.

Copies of the applications, subsequently prepared draft permits, review summaries and other support materials are available for review in the regional office identified in this notice. Persons interested in reviewing the application files should contact the appropriate regional office to schedule an appointment.

Persons wishing to receive a copy of a proposed plan approval or operating permit must indicate their interest to the Department regional office within 30 days of the date of this notice and must file protests or comments on a proposed plan approval or operating permit within 30 days of the Department providing a copy of the proposed document to that person or within 30 days of its publication in the *Pennsylvania Bulletin*, whichever comes first. Interested persons may also request that a hearing be held concerning the proposed plan approval and operating permit. Comments or protests filed with the Department regional offices must include a concise statement of the objections to the issuance of the Plan approval or operating permit and relevant facts which serve as the basis for the objections. If the Department schedules a hearing, a notice will be published in the *Pennsylvania Bulletin* at least 30 days prior the date of the hearing.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office identified before the application. TDD users should contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

Final plan approvals and operating permits will contain terms and conditions to ensure that the source is constructed and operating in compliance with applicable requirements in 25 Pa. Code Chapters 121–143, the Federal Clean Air Act (act) and regulations adopted under the act.

General Conditions

34. Words and terms that are not otherwise defined in this plan approval shall have the meanings set forth in section 3 of the Air Pollution Control Act (APCA).

35. The issuance of this plan approval does not prevent the future adoption by the Department of any rules, regulations or standards, or the issuance of orders necessary to comply with the requirements of the Federal Clean Air Act (CAA) or the APCA, or to achieve or maintain ambient air quality standards. The issuance of this plan approval shall not be construed to limit the Department's enforcement authority.

36. This plan approval authorizes temporary operation of the sources covered by this plan approval provided the following conditions are met.

37. When construction, installation, modification or re-activation is being conducted, the permittee should provide written notice to the Department of the completion of the activity approved by this plan approval and the permittee's intent to commence operation at least 5 working days prior to the completion of said activity. The notice shall state when the activity will be completed and when the permittee expects to commence operation. When the activity involves multiple sources on different time schedules, notice is required for the commencement of operation of each source.

38. Under 25 Pa. Code § 127.12b(d), temporary operation of the sources to facilitate the shakedown of sources and air cleaning devices, to permit operations pending the issuance of a permit under 25 Pa. Code Chapter 127, Subchapter F or G (relating to operating permits; and Title V operating permits) or to permit the evaluation of the air contaminant aspects of the source.

39. This plan approval authorizes a temporary operation period not to exceed 180 days from the date of commencement of operation, provided the Department receives notice from the permittee under paragraph (a), previously.

40. The permittee may request an extension of the 180-day shakedown period if further evaluation of the air contamination aspects of the sources is necessary. The request for an extension should be submitted, in writing, to the Department at least 15 days prior to the end of the initial 180-day shakedown period and shall provide a description of the compliance status of the source, a detailed schedule for establishing compliance, and the reasons compliance has not been established. This temporary operation period will be valid for a limited time and may be extended for additional limited periods, each not to exceed 180 days.

41. The notice submitted by the permittee under subpart a. previous, prior to the expiration date of the plan approval, shall modify the plan approval expiration date on page 1 of this plan approval. The new plan approval expiration date shall be 180 days from the date of commencement of operation.

42. The permittee shall maintain and operate the sources and associated air cleaning devices in accordance with good engineering practice as described in the plan approval application submitted to the Department.

43. The records, reports or information obtained by the Department or referred to at public hearings shall be available to the public, except as provided in paragraph a. of this condition.

44. Upon cause shown by the permittee that the records, reports or information or a particular portion thereof, but not emission data, to which the Department has access under the act, if made public, would divulge production or sales figures or methods, processes or production unique to that person or would otherwise tend to affect adversely the competitive position of that person by revealing trade secrets, including intellectual property rights, the Department will consider the record, report or information, or particular portion thereof confidential in the administration of the act. The Department will implement this section consistent with sections 112(d) and 114(c) of the CAA (42 U.S.C.A. §§ 7412(d) and 7414(c)). Nothing in this section prevents disclosure of the report, record or information to Federal, State or local

representatives as necessary for purposes of administration of Federal, State or local air pollution control laws, or when relevant in a proceeding under the act.

45. This plan approval will be valid for a limited time, as specified by the expiration date contained on page 1 of this plan approval. Except as provided in §§ 127.11a and 127.215 (relating to reactivation of sources; and reactivation), at the end of the time, if the construction, modification, reactivation or installation has not been completed, a new plan approval application or an extension of the previous approval will be required.

46. If construction has commenced, but cannot be completed before the expiration of this plan approval, an extension of the plan approval must be obtained to continue construction. To allow adequate time for departmental action, a request for the extension should be postmarked at least 30 days prior to the expiration date. The Department will not issue an extension after the plan approval expires. The request for an extension should include the following:

47. A justification for the extension,

48. A schedule for the completion of the construction.

49. If construction has not commenced before the expiration of this plan approval, then a new plan approval application must be submitted and approval obtained before construction can commence.

50. If the construction, modification or installation is not commenced within 18-months of the issuance of this plan approval or if there is more than an 18-month lapse in construction, modification or installation, a new plan approval application that meets the requirements of 25 Pa. Code Chapter 127, Subchapters B, D and E (relating to plan approval requirement; prevention of significant deterioration of air quality; and new source review) shall be submitted.

51. This plan approval may not be transferred from one person to another except when a change of ownership is demonstrated to the satisfaction of the Department and the Department approves the transfer of the plan approval in writing.

52. Section 127.12a (relating to compliance review) applies to a request for transfer of a plan approval. A compliance review form shall accompany the request.

53. This plan approval is valid only for the specific source and the specific location of the source as described in the application.

54. Under 35 P.S. § 4008, no person shall hinder, obstruct, prevent or interfere with the Department or its personnel in the performance of any duty authorized under the APCA.

55. The permittee shall also allow the Department to have access at reasonable times to say sources and associated air cleaning devices with such measuring and recording equipment, including equipment recording visual observations, as the Department deems necessary and proper for performing its duties and for the effective enforcement of the APCA and regulations adopted under the act.

56. Nothing in this plan approval condition shall limit the ability of the EPA to inspect or enter the premises of the permittee in accordance with section 114 or other applicable provisions of the CAA.

57. This plan approval may be terminated, modified, suspended or revoked and reissued if one or more of the following applies:

58. The permittee constructs or operates the source subject to the plan approval in violation of the act, the CAA, the regulations promulgated under the act or the CAA, a plan approval or permit or in a manner that causes air pollution.

59. The permittee fails to properly or adequately maintain or repair an air pollution control device or equipment attached to or otherwise made a part of the source.

60. The permittee fails to submit a report required by this plan approval.

61. The EPA determines that this plan approval is not in compliance with the CAA or the regulations there under.

62. The permittee, or any other person, may not circumvent the new source review requirements of 25 Pa. Code Chapter 127, Subchapter E by causing or allowing a pattern of ownership or development, including the phasing, staging, delaying or engaging in incremental construction, over a geographic area of a facility which, except for the pattern of ownership or development, would otherwise require a permit or submission of a plan approval application.

63. No person may permit the use of a device, stack height which exceeds good engineering practice stack height, dispersion technique or other technique which, without resulting in reduction of the total amount of air contaminants emitted, conceals or dilutes an emission of air contaminants which would otherwise be in violation of this plan approval, the APCA or the regulations promulgated hereunder, except that with prior approval of the Department, the device or technique may be used for control of malodors.

64. Reports, test data, monitoring data, notifications shall be submitted to the:

Regional Air Program Manager
Department of Environmental Protection
400 Waterfront Drive

S. §§ 1406.1—1406.21). Mining activity permits issued in response to such applications will also address the applicable permitting requirements of the following statutes: the Air Pollution Control Act (35 P. S. §§ 4001—4015); the Dam Safety and Encroachments Act (32 P. S. §§ 693.1—693.27); and the Solid Waste Management Act (35 P. S. §§ 6018.101—6018.1003).

The following permit applications to conduct mining activities have been received by the Department of Environmental Protection (Department). A copy of the application is available for inspection at the District Mining Office indicated above each application. Where a 401 Water Quality Certification is needed for any aspect of a particular proposed mining activity, the submittal of the permit application will serve as the request for the certification.

Written comments or objections, or requests for an informal conference, or a public hearing, as applicable, on a mining permit application may be submitted by any person or any officer or head of any Federal, State or local government agency or authority to the Department at the address of the district mining office indicated above each application within 30 days of this publication, or within 30 days after the last publication of the applicant's newspaper advertisement, as provided by 25 Pa. Code §§ 77.121—77.123 and 86.31—86.34.

Written comments or objections related to a mining permit application should contain the name, address and number of persons submitting comments or objections; application number; and a statement of sufficient detail to inform the Department on the basis of comment or objection and relevant facts upon which it is based.

Requests for an informal conference, or a public hearing, as applicable, on a mining permit application, as provided by 25 Pa. Code §§ 77.123 or 86.34, must contain the name, address and number of the requestor; the application number; a brief summary of the issues to be raised by the requestor at the conference; and a statement whether the requestor desires to have the conference conducted in the locality of the proposed mining activities.

When a National Pollutant Discharge Elimination System (NPDES) number is listed, the mining activity permit application was accompanied by an application for an individual NPDES permit. The Department has made a tentative determination to issue the NPDES permit in conjunction with the mining activity permit, but the issuance of the NPDES permit is contingent upon the approval of the associated mining activity permit.

For coal mining activities, NPDES permits, when issued, will contain effluent limits that do not exceed the technology-based effluent limitations. The proposed limits are listed in Table 1.

For noncoal mining activities, the proposed limits are found in Table 2. Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description below specifies the parameters. The limits will be in the ranges specified in Table 1.

More restrictive effluent limitations, restrictions on discharge volume, or restrictions on the extent of mining that may occur, will be incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91–96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 362-0600-001, NPDES Program Implementation—Memorandum of Understanding Concerning Water Quality Management, NPDES Program Implementation and Related Matters. Other specific factors to be considered include public comments and Total Maximum Daily Loads (TMDLs).

Persons wishing to comment on an NPDES permit application should submit a statement to the Department at the address of the district mining office indicated previously each application within 30 days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92.61. The request or petition for a public hearing shall be filed within 30 days of this public notice and shall contain the name, address, number and the interest of the party filing the request, and shall state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. In the case where a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

PERMITS**

The Department of Environmental Protection has taken the following actions on applications received under the Pennsylvania Safe Drinking Water Act (35 P.S. §§ 721.1—721.17) for the construction, substantial modification or operation of a public water system.

Persons aggrieved by an action may appeal, under section 4 of the Environmental Hearing Board Act (35 P.S. § 7514) and 2 Pa.C.S. §§ 501—508 and 701—704 (relating to the Administrative Agency Law), to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, P. O.

Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users should contact the Environmental Hearing Board (Board) through the Pennsylvania AT&T Relay Service, (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin*, unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary of the Board at (717) 787-3483. This paragraph does not, in and of itself, create any right of appeal beyond that permitted by applicable statutes and decision law.

For individuals who wish to challenge an action, appeals must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this notice to a lawyer at once. Persons who cannot afford a lawyer may qualify for free pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

SEWAGE FACILITIES ACT PLAN APPROVAL

Plan Approvals Granted under the Pennsylvania Sewage Facilities Act (35 P. S. § 750.5)

Southcentral Region: Water Management Program Manager, 909 Elmerton Avenue, Harrisburg, PA 17110, (717) 705-4707.

Plan Location:

<i>Borough or Township</i>	<i>Borough or Township Address</i>	<i>County</i>
Penn Township	20 Wayne Avenue Hanover, PA 17331	York County

Plan Description: Penn Township Main Interceptor, DEP Code No. A3-67951-219-3m: The approved plan provides for the replacement of Penn Township's main interceptor to address infiltration issues. The new interceptor's capacity will be 14.7 mgd, and it will be located along Oil Creek from Manhole 18 near York Street to Manhole 5 west of Wilson Avenue, at which point, it will run straight to the Penn Township Wastewater Treatment Plant in Penn Township, York County. Any required NPDES Permits or WQM Permits must be obtained in the name of the municipality or authority as appropriate.

SEWAGE FACILITIES ACT PLAN DISAPPROVAL

Plan Disapprovals Granted under the Pennsylvania Sewage Facilities Act (35 P. S. § 750.5)

Southcentral Region: Water Management Program Manager, 909 Elmerton Avenue, Harrisburg, PA 17110, (717) 705-4707.

Plan Location:

<i>Borough or Township</i>	<i>Borough or Township Address</i>	<i>County</i>
Newberry Township	1915 Old Trail Road Etters, PA 17319	York County

Plan Description: Rick Drawbaugh, DEP Code No. A3-67945-354-2: The plan consists of a five lot single-family residential subdivision on 37.438 acres with total proposed sewage flows of 1,600 gpd to be treated by individual onlot disposal systems. The proposed development is located on Kise Mill Road at its intersection with Popps Ford Road in Newberry Township, York County. The plan was disapproved because Lots 1 and 4 of the subdivision fail to meet the recommended lot size of the preliminary hydrogeologic study required by 25 Pa. Code § 71.62(c). As proposed, the onsite sewage systems for Lots 1 and 4 will pollute the waters of the Commonwealth in violation of the The Clean Streams Law. Such a condition is considered a nuisance and is prohibited.

HAZARDOUS SITES CLEAN-UP UNDER THE ACT OF OCTOBER 18, 1988

Notice of Prompt Interim Response and Proposed Interim Response

Monocacy Creek PCE Site Amity Township, Berks County

The Department of Environmental Protection (Department), under the authority of the Hazardous Sites Cleanup Act (HSCA) (35 P. S. §§ 6020.101—6020.1305) has initiated a prompt interim response and proposes an interim response at the Monocacy Creek PCE Site (Site). The prompt interim response has been initiated under sections 501(a) and 505(b) of the HSCA (35 P. S. §§ 6020.501(a) and 6020.505(b)).

The Site is an area of groundwater contaminated located between Route 422 and the north side of Schuylkill River in Amity Township, Berks County. Groundwater serving residential wells in the area of Monocacy Creek Road and Thalia Lane are contaminated with tetrachloroethylene (also known as perchloroethylene or PCE), a VOC. This residential area located on the southern edge of Amity Township utilizes private wells and is not connected to the public water supply serving the area. Since January 2007 the Department has sampled 31 groundwater supply wells. This sampling yielded some level of PCE contamination in 11 wells with four of the wells having levels above 5 parts per billion (ppb). The PCE levels ranged from 0.15 ppb to 26.0 ppb. The Maximum Contaminant Level for public water supplies and the Statewide Health Standard for groundwater cleanup for PCE is 5 ppb. The residents are exposed to PCE through ingestion, inhalation, and dermal contact. PCE is listed as a probable human carcinogen. Chronic effects include nervous system depression and heart damage.

After considering institutional controls, bottled water, point of use water treatment units, and connection to the public water system the Department is proposing to continue supplying bottled water as a prompt interim response and connection to the public water system as

the interim response for the site. The Department would continue to furnish commercial bottled water to residences that have a water supply contaminated in excess of 5 ppb of PCE until the residences are connected to the public water supply. Residences in the projected contamination plume (approximately 20) will be connected to the public water distribution line on Monocacy Creek Road. The Department's response will include extending the water line into Thalia Lane and installing the lateral water line into each home water distribution system. Any fees related to the initial connection to the system, the abandoning of affected wells and all necessary restoration work will be included in the response. This action will eliminate ingestion, inhalation and dermal contact. This alternative will provide maximum protection by removing all exposure to contaminated groundwater serving private water supply systems. The Department will assure that all existing house wells of residents connected to the public water will be disconnected and abandoned in accordance with the Department's approved specifications. This will eliminate all exposure with the contaminated groundwater, the fugitive release of the PCE to the outdoor air in the neighborhood, and the possibility of cross connection to the public water supply.

The Department is providing this notice under sections 505(b) and 506(b) of HSCA, and the publication of this notice in the *Pennsylvania Bulletin* starts the administrative record period under HSCA. The Administrative Record which contains information about this site and which supports the Department's decision to perform this action at the site is available for public review and comment. The Administrative Record can be examined Monday through Friday from 8 a.m. to 4 p.m. at the Department's Southcentral Regional Office located at 909 Elmerton Avenue, Harrisburg, PA 17110, by contacting Crystal Lemmon at (717) 705-6645. The Administrative Record can also be reviewed at the Amity Township Building, 2004 Weavertown Road, Douglassville, PA from 8 a.m. to 4 p.m.

The Administrative record will be open for comment from the date of publication of this notice in the *Pennsylvania Bulletin* on August 1, 2009, and will remain open for 90 days. Persons may submit written comments regarding this action to the Department before October 30, 2009, by mailing them to Crystal Lemmon at the Department Southcentral Regional Office, 909 Elmerton Avenue, Harrisburg, PA 17110-8200. The public will have an opportunity to present oral comments regarding the proposed action at a public hearing. The hearing has been scheduled for September 15, 2009, at 7 p.m. at the Amity Township Building. Persons wishing to present formal oral comment at the hearing should register before 4 p.m., September 11, 2009, by calling Lauri Lebo at (717) 705-4931. If no person registers to present oral comments, by September 11, 2009, the hearing will not be held, but will be replaced with an informational meeting. Persons interested in finding out if anyone has registered, and if the hearing will be held, should also contact Lauri Lebo at the number listed previously. Persons with a disability, who wish to attend the hearing and require an auxiliary aid, service or other accommodation to participate in the proceedings, should call Lauri Lebo at the previous number or through the Pennsylvania AT&T Relay Service at (800) 654-5984 (TDD) to discuss how the Department may accommodate their needs.

UNDER ACT 2, 1995

PREAMBLE 2

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.908).

Provisions of Chapter 3 of the Land Recycling and Environmental Remediation Standards Act (act) require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, shall also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a Site-Specific Standard remediation. A remedial investigation report includes conclusions from the site investigation, concentration of regulated substances in environmental media; benefits of reuse of the property and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the Environmental Cleanup Program manager in the Department regional office after which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the Community Relations Coordinator at the appropriate regional office. FISH AND BOAT COMMISSION

Proposed Removal from List of Class A Wild Trout Waters Baldwin Run, Tioga County

The Fish and Boat Commission (Commission) is considering a change to its list of Class A Wild Trout Streams. Under 58 Pa. Code § 57.8a (relating to Class A wild trout streams), it is the Commission's policy to manage self-sustaining Class A wild trout populations as a renewable natural resource to conserve that resource and the angling it provides. Class A wild trout populations represent the best of Pennsylvania's naturally reproducing trout fisheries. The Commission manages these stream sections solely for the perpetuation of the wild trout fishery with no stocking.

Criteria developed for Class A Wild Trout fisheries are species specific. Wild Trout Abundance Class Criteria include provisions for:

(i) *Wild Brook Trout Fisheries*

(A) Total brook trout biomass of at least 30 kg/ha (26.7 lbs/acre).

(B) Total biomass of brook trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lbs/acre).

(C) Brook trout biomass must comprise at least 75% of the total trout biomass.

(ii) *Wild Brown Trout Fisheries*

(A) Total brown trout biomass of at least 40 kg/ha (35.6 lbs/acre).

(B) Total biomass of brown trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lbs/acre).

(C) Brown trout biomass must comprise at least 75% of the total trout biomass.

(iii) *Mixed Wild Brook and Brown Trout Fisheries*

(A) Combined brook and brown trout biomass of at least 40 kg/ha (35.6 lbs/acre).

(B) Total biomass of brook trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lbs/acre).

(C) Total biomass of brown trout less than 15 cm (5.9 inches) in total length of at least 0.1 kg/ha (0.089 lbs/acre).

(D) Brook trout biomass must comprise less than 75% of the total trout biomass.

(E) Brown trout biomass must comprise less than 75% of the total trout biomass.

(iv) *Wild Rainbow Trout Fisheries*

Total biomass of rainbow trout less than 15 cm (5.9 inches) in total length of at least 2.0 kg/ha (1.78 lbs/acre).

For a water to be removed from the Class A Wild Trout Streams designation, total trout biomass must be documented below the set criteria for two consecutive stream examinations.

During two consecutive stream surveys on October 30, 2008, and July 14, 2009, Commission staff documented that there are no wild trout in the 1.16-mile section of Baldwin Run, Tioga County, from "The Muck" to the mouth of the stream. The Commission therefore intends to consider removing this stream section from its list of Class A Wild Trout Streams at a future meeting.

Baldwin Run is a tributary to Marsh Creek and was initially surveyed by Commission staff in 1995. Survey results indicated the presence of a very good wild brook trout population with an estimated biomass of 40.5 kg/ha. Baldwin Run, from the headwaters to the mouth, was subsequently recommended for addition to the Class A Wild Trout Waters List and was approved by the Commission as a Class A Wild Trout Water in 1999. However, subsequent evaluation of Baldwin Run indicated that the stream's character significantly changes when it flows out of the narrow mountainous valley (where the initial

survey was conducted in 1995) and reaches the wide valley floor. Results of the 2008 survey indicate that the lower 1.16 miles of Baldwin Run (below the large wetland complex) harbors a warm/coolwater fish community, including bluntnose minnow, brown bullhead, central stoneroller, chain pickerel, creek chub, creek chubsucker, pumpkinseed, tessellated darter, and white sucker; no trout were collected. Results of the 2009 survey were consistent with those of the 2008 survey.

Persons with comments, objections or suggestions concerning the removal are invited to submit comments in writing to Executive Director, Fish and Boat Commission, P. O. Box 67000, Harrisburg, PA 17106-7000, within 30 days after publication of this notice in the *Pennsylvania Bulletin*. Comments also may be submitted electronically by completing the form at www.fishandboat.com/regcomments. If an acknowledgment of electronic comments is not received by the sender within 2 working days, the comments should be retransmitted to ensure receipt. Electronic comments submitted in any other manner will not be accepted.

Interested persons are invited to submit written comments, objections or suggestions about the notice to the Executive Director, Fish and Boat Commission, P. O. Box 67000, Harrisburg, PA 17106-7000, within 10 days after publication of this notice in the *Pennsylvania Bulletin*. Comments submitted by facsimile will not be accepted. GOVERNOR'S OFFICE

Catalog of Nonregulatory Documents

Under Executive Order 1996-1, agencies under the jurisdiction of the Governor must catalog and publish nonregulatory documents such as policy statements, guidance manuals, decisions, rules and other written materials that provide compliance related information. The following compilation is the thirteenth list of the nonregulatory documents. This list is updated and published annually on the first Saturday in August.

This catalog is being provided to ensure that the public has complete access to the information necessary to understand and comply with state regulations. We have made every effort to ensure that the catalog includes all documents in effect as of August 1, 2009; however, due to the breadth and changing nature of these documents, we cannot guarantee absolute accuracy. Facilitating access to information is important to enhancing the partnership between the regulated community and the state.

BOARD OF PARDONS

Factors Considered by the Board of Pardons

In Evaluating Pardon/Commutation Requests

Many individuals call, write or email the Board of Pardons seeking information about what factors the Board deems most important in considering pardon/commutation requests. Some wish to use this information to help them decide whether to apply for clemency. Others seek the information to assist them in completing their applications after they have decided to apply.

Neither the Pennsylvania Constitution nor the laws or regulations governing the Board establish minimum eligibility requirements in order to apply for executive clemency. Also, the law does not establish a specific list of factors that the Board must consider in evaluating applications. As a result, each of the five Board members is free to rely upon the information that he/she feels is most important both in deciding to grant a public hearing and in deciding to recommend clemency to the Governor.

The Board believes that it will be helpful to clemency applicants and the public generally to provide a list of some of the factors that have been considered by the Board in the past in evaluating clemency applications. This list is by no means exclusive, and is not applied by every Board member in every case. Satisfaction of the criteria identified below does not entitle the applicant to clemency, nor does failure to satisfy the criteria automatically result in rejection of the application. Rather, the Board evaluates every application on a case-by-case basis to determine whether clemency is appropriate.

Factors Considered in Pardon Applications

1. How much time has elapsed since the commission of the crime(s)? Obviously, this factor, coupled with being crime free after the offense, is one of the best indicators of whether the applicant has been successfully rehabilitated. Further, the more serious, or numerous, the crime(s), the greater the period of successful rehabilitation that the applicant should be able to demonstrate.

2. Has the applicant complied with all court requirements? The applicant should be able to demonstrate successful completion of all court-imposed requirements such as probation, parole, and payment of all fines and costs. If unsure of the latter, applicants should check with the County Clerk of Courts, and get receipts for any recent payments.

3. Has the applicant made positive changes to his/her life since the offense(s)? Successful rehabilitation may also be demonstrated by positive changes since the offense(s) in applicant's career, education, family or through community or volunteer service, particularly in areas that relate to the offense(s).

4. What is the specific need for clemency? The applicant should identify a specific need for clemency, e.g., a particular job that applicant cannot get, or some particular activity that he/she cannot participate in without clemency, as opposed to the more general answers of "employment purposes" or "to put this behind me" that applicants frequently use.

5. What is the impact on the victim(s) of the offense(s)? The Board's regulations require that victims or next of kin be notified and given the opportunity to appear at the hearing or make a confidential submission in writing. Applicants should be aware that victims or next of kin may be present and, in any event, will have their viewpoint considered by the Board.

Factors Considered in Commutation of Sentence Applications

1. Does the applicant still have appeals pending in any court? The Board views clemency as an extraordinary remedy that should ordinarily be resorted to only after all legal remedies have been exhausted.

2. Is the applicant eligible for parole or will he/she be eligible within a reasonable period of time? In most cases, parole is the more appropriate avenue for release by applicants eligible for parole.

3. Has an appropriate period of incarceration been served based on the circumstances of the offense?

4. Has the applicant maintained an appropriate conduct record for consideration of clemency? The Board looks to the number of both serious and minor misconducts as a reliable indicator of the rehabilitation of the applicant.

5. Has the applicant had a successful work record and/or availed himself/herself of the programming opportunities for self-improvement that are available through the correctional facility? Again, the Board views these factors as reliable indicators of the rehabilitation of the applicant.

6. What is the impact on the victim(s) of the offense(s)? The Board's regulations require that victims or next of kin be notified and given the opportunity to appear at the hearing or make a confidential submission in writing. Applicants should be aware that victims or next of kin may be present and, in any event, will have their viewpoint considered by the Board.

Updated Guidelines for Record Retention; No. 2009-07

This notice and accompanying Record Retention Guidelines (Guidelines) are intended to assist insurers in establishing appropriate record retention procedures for purposes of financial and market conduct examinations conducted by the Insurance Department (Department) under Article IX of The Insurance Department Act of 1921 (40 P. S. §§ 323.1—323.8) (act).

The general requirement for retention of records is 7 years from execution of the record, unless otherwise

specified in the Guidelines. The 7-year period allows for conclusion of the financial examination process within timeliness standards adopted by the National Association of Insurance Commissioners (NAIC) Financial Regulation Standards and Accreditation Committee. The Guidelines supplement the 7-year general requirement by providing guidance in the establishment of appropriate retention periods for specific types of records for purposes of both financial and market conduct examinations.

Of course, the Guidelines are recommended minimum retention periods and do not affect any record retention requirements that may be in excess of the Guidelines,

such as requirements imposed by the Internal Revenue Service, other regulatory agencies, statutes of limitation, or other applicable laws or regulations. The Department recognizes the need for insurers to exercise discretion in establishing record retention requirements in accordance with advice of legal counsel and that insurers may determine that longer retention periods are necessary or advisable. In addition, under the authority in the Act, the Department may require whatever additional records may be necessary to readily verify the financial condition of an insurer and ascertain whether the insurer has complied with the laws of this Commonwealth. For purposes of financial and market conduct examinations, the Department will permit insurers not domiciled in this Commonwealth to retain records either for the length of time specified in the Guidelines or for the length of time required for examination purposes in the insurers' domiciliary jurisdictions.

With respect to the use of electronic paperless filing systems, 15 Pa.C.S. § 107 (relating to form of records) which applies to insurance corporations provides, in part:

Any records maintained by a corporation or other association in the regular course of its business including shareholder or membership records, books of account and minute books, may be kept on, or be in the form of, punch cards, magnetic storage media, photographs, microphotographs or any other information storage device if the records so kept can be converted into reasonable legible written form within a reasonable time.

Sections 903 and 904 of the act (40 P. S. §§ 323.3 and 323.4) require entities subject to the Department's examination to keep records in such manner as the Department may require to readily verify the examinee's financial condition and compliance with laws and to provide timely, convenient and free access to all records. Therefore, insurers are not prohibited from using paperless filing technology as long as their records are readily accessible and useable for examination purposes.

A paperless system should include adequate controls and be appropriately tested to identify and correct any deficiencies. Record storage sites should have appropriate security systems and adequate protection from loss or damage by fire or other hazards. An electronic record must accurately reflect the information in the record as it was first generated. Recordkeeping systems must be archival in nature and include safeguards that provide reasonable assurances against tampering, alteration or degradation of records. Paperless systems must have the capability to reproduce records in hard copy or other medium acceptable to the Department that is as legible as the original document and that includes all information in the original record, including but not limited to signatures, notations and approval stamps. Sufficient visual terminals must be available to provide Department examiners with ready access to data during the course of an examination.

An insurer's management must use prudent judgment in determining appropriate record retention policies, subject to applicable statutory requirements or restrictions. Questions concerning record retention relating to financial examinations may be directed to David DelBiondo, Director, Bureau of Financial Examinations at (717) 783-2142. Questions relating to market conduct examinations may be directed to Peter Camacci, Director of the Bureau of Market Conduct at (717) 787-9100.

PROPOSED RULEMAKING

DEPARTMENT OF AGRICULTURE

[7 PA. CODE CHS. 59 AND 59a]

Milk Sanitation

The Department of Agriculture (Department) proposes to rescind the current Chapter 59 (relating to milk sanitation) and establish a new Chapter 59a (relating to milk sanitation) to read as set forth in Annex A.

Statutory Authority

The Milk Sanitation Law (law) (31 P. S. §§ 645—660g) and the Food Act (act) (31 P. S. §§ 20.1—20.18) provide the legal authority for this rulemaking.

The law prohibits the sale of milk, milk products or manufactured dairy products within this Commonwealth unless the seller has a Department-issued permit, and authorizes the Department to adopt regulations necessary for the proper enforcement of the act. See 31 P. S. §§ 645 and 660c.

The act includes milk within the definition of a “potentially hazardous food” and provides the Department broad authority to regulate as necessary for the proper enforcement of that statute, but limits the circumstances under which the regulations can be inconsistent with Federal acts and regulations addressing the same subject matter. See 31 P. S. §§ 20.2, 20.13 and 20.16.

Purpose

The protection of the health and safety of persons who consume milk, milk products and manufactured dairy products is the primary purpose of the proposed regulations. The secondary purpose is to provide the regulated community—persons who produce milk, milk products and manufactured dairy products within this Commonwealth for sale—with clearer standards that facilitate the production and sale of Pennsylvania-produced dairy products. The regulated community is quite diverse, with the size and sophistication of dairy production and processing operations varying dramatically. The proposed rulemaking would provide the entire regulated community clearer and better guidance on the basic sanitation and safe production practices necessary to protect the health and safety of consumers and preserve the vitality of this Commonwealth’s diverse dairy industry.

The proposed rulemaking would update the Department’s milk sanitation regulations to reflect developments in food science and food technology since the regulations were last amended. Food safety science is an evolving body of knowledge; and the proposed rulemaking would help bring the Commonwealth’s standards into alignment with the current state of the science.

In addition, the proposed rulemaking would bring the Commonwealth’s regulatory standards relating to pasteurized milk into closer alignment with those recommended in the current *Grade “A” Pasteurized Milk Ordinance* (Grade “A” PMO). The Grade “A” PMO is a model document issued and updated by the United States Department of Health and Human Services, Public Health Service, Food and Drug Administration. That agency recommends the Grade “A” PMO for adoption by all States “. . . in order to encourage greater uniformity and a higher level of excellence of milk sanitation practice

in the United States” and to “facilitate the shipment and acceptance of milk and milk products of high sanitary quality in interstate and intrastate commerce.”

The proposed rulemaking would also bring the Commonwealth’s regulatory standards relating to milk for manufacturing (milk that is produced for processing and manufacturing into products for human consumption that is not subject to the same requirements as milk for pasteurization) into closer alignment with those recommended in the current *Milk for Manufacturing Purposes and its Production and Processing—Recommended Requirements* (USDA Recommended Requirements) document issued by the United States Department of Agriculture, Agricultural Marketing Service, Dairy Program.

The proposed rulemaking would also consolidate and update provisions relating to the production of raw milk for human consumption.

The proposed rulemaking would help the regulated community by providing greater clarity, facilitating interstate commerce in pasteurized milk and bringing the Commonwealth’s milk sanitation standards into alignment with well-known and well-regarded Federal standards.

Need for the Proposed Rulemaking

The proposed rulemaking is a much-needed update of the Department’s milk sanitation regulations. The ultimate objectives of the proposed rulemaking are to help protect the health and safety of the consumer public, implement regulatory standards that align with National model standards and make the milk sanitation regulations more understandable to the regulated community.

The Department is satisfied there are no reasonable alternatives to proceeding with the proposed rulemaking. The Department is also satisfied the proposed rulemaking meets the requirements of Executive Order No. 1996-1, “Regulatory Review and Promulgation.”

Overview of the Major Provisions of the Proposed Rulemaking

Proposed Subchapter A (relating to preliminary provisions) would lay the groundwork for the regulatory requirements that follow. Proposed § 59a.2 (relating to definitions) contains various defined terms from the law, the act, the Grade “A” PMO, the current regulations in Chapter 59 and other sources. Proposed § 59a.4 (relating to approved inspectors) would establish the process by which a person may become an “approved inspector” authorized to conduct dairy farm inspections. Proposed § 59a.5 (relating to standards for Pennsylvania-approved dairy laboratories, official laboratories and other laboratories; reports of results) would reference and adopt well-regarded National standards for the testing and examination of dairy products, and for the evaluation of dairy laboratories.

Proposed § 59a.11 (relating to adoption of Grade “A” PMO) would establish the standards of the Grade “A” PMO as those of the Department, except to the extent they are specifically contradicted by the act, the law or a specific provision in Chapter 59a. Although this single reference would suffice to incorporate the Grade “A” PMO standards as those of the Department, a number of other sections in Chapter 59a contain references to specific provisions of the Grade “A” PMO as guides to the regulated community.

Proposed § 59a.12 (relating to permits) would provide an overview of the process by which a person may obtain a permit from the Department, authorizing the lawful sale of milk, raw milk or manufactured dairy products.

Proposed § 59a.14 (relating to labeling: bottles, containers and packages of milk, milk products or manufactured dairy products) would provide detailed guidance on the type of product label information that would be helpful to the consumer.

Proposed § 59a.17 (relating to inspection of dairy farms and milk plants) would establish a requirement that dairy farm operations be inspected at least once every 6 months, and that milk plants and receiving stations be inspected at least once every 3 months. These inspection intervals derive from the Grade "A" PMO.

Proposed Subchapter C (relating to production and processing of milk for manufacturing purposes) would adopt the USDA Recommended Requirements as the Department's regulatory standards with respect to milk for manufacturing.

Proposed Subchapter D (relating to farms producing milk for manufacturing) would establish on-farm sanitation, equipment and procedural standards for farms that produce milk that is to be processed into manufactured dairy products for human consumption, but that is not subject to the same requirements as milk that is bound for fluid consumption.

Although proposed Subchapter E (relating to manufacturing plants) would supplant current Chapter 59, Subchapter G (relating to manufacturing), the result is basically an updating of current regulatory standards for plants that manufacture dairy products.

Proposed Subchapter F (relating to raw milk for human consumption) is intended to establish clear, reasonable standards for those dairy operations that produce unpasteurized milk for human consumption. The current regulatory provisions addressing the production of raw milk for human consumption are spread throughout Chapter 59, are hard to find, and do not cover all of the subject matter that should be addressed in regulations on this subject. In recent years, the Department has experienced a dramatic rise in the number of dairy operations that produce raw milk for human consumption under authority of Department-issued permits. The Department expects this new subchapter will provide raw milk permitholders a clear set of regulatory standards under which to operate.

Proposed § 59a.501 (relating to interrelatedness with Food Act) would make the important point that the act provides the Department separate-but-related legal authority by which to address matters relating to milk (which is defined as a "potentially hazardous food" under the act).

Affected Individuals and Organizations

The proposed rulemaking would benefit nearly all Commonwealth residents, since the majority of this Commonwealth's 12.4 million citizens are consumers of milk and dairy products.

Pennsylvania's 8,500-plus dairy producers and 872-plus milk permitholders will also benefit from the rulemaking. In addition, approximately 120 raw milk producers, and the persons who acquire and consume raw milk from these producers, will benefit from the updated raw milk permit provisions that will clarify the requirements for obtaining and maintaining a raw milk permit and attempt to protect the health of raw milk consumers. Also,

approximately 40 Grade "A" milk processing plants, approximately 120 Grade "A" bulk tank units (permitted farm groups), approximately 80 dairy manufacturing (non-Grade A) facilities, 46 Interstate milk shippers program certified laboratory facilities, 57 drug residue testing facilities, and 26 manufacturers of single service containers and closures will be impacted.

Fiscal Impact

Commonwealth: The proposed rulemaking is expected to impose approximately \$180,000 per year in additional costs upon the Department, commencing with the Fiscal Year 2010-2011.

Political Subdivisions: The proposed rulemaking would impose no costs and have no fiscal impact upon political subdivisions.

Private Sector: Most of the impacted regulatory community is familiar with the Grade "A" PMO and the USDA Recommended Requirements, and produces milk, milk products and manufactured dairy products to the standards prescribed by those documents. For these entities, the proposed rulemaking will have very little impact on day-to-day operations, and will not impose any appreciable new costs. In addition, the Department plans to help train the regulated community to minimize confusion and costs related to implementing the new regulatory standards. A small section of the regulated community—approximately 40 dairy operations that process milk for in-State sales only—may need to acquire drug residue testing equipment in the initial year after the proposed regulations take effect, or to incur costs related to testing by third-party laboratories. The Department estimates these dairy operations would, in the aggregate, incur total costs of approximately \$85,200 in the first year after the proposed regulations take effect, and costs of approximately \$55,200 in subsequent years.

General Public: The proposed rulemaking would impose no costs and have no fiscal impact on the general public. The proposal would enhance public safety.

Paperwork Requirements

The proposed rulemaking is not likely to appreciably impact upon the paperwork generated by the Department or the regulated community.

Effective Date

The proposed rulemaking will be effective upon publication in the *Pennsylvania Bulletin* as final-form rulemaking.

Sunset Date

There is no sunset date for the proposed rulemaking. The Department will review the efficacy of these regulations on an ongoing basis.

Public Comment Period/Contact Person

Interested persons are invited to submit written comments regarding the proposed regulations within 30 days following publication in the *Pennsylvania Bulletin*. Comments are to be submitted to the Department of Agriculture, Bureau of Food Safety, Division of Milk Sanitation, 2301 North Cameron Street, Harrisburg, PA 17110-9408, Attention: Paul Hoge.

Regulatory Review

The Department submitted a copy of the proposed regulations to the Independent Regulatory Review Commission (IRRC) and to the Chairpersons of the House and Senate Standing Committees (Committees) on Agriculture and Rural Affairs on July 21, 2009, in accordance with

section 5(a) of the Regulatory Review Act (71 P.S. § 745.5(a)). The Department also provided IRRC and the Committees a detailed Regulatory Analysis Form prepared by the Department in compliance with Executive Order 1996-1, "Regulatory Review and Promulgation." A copy of this material is available to the public upon request.

If IRRC has an objection to any portion of the proposed regulations, it must so notify the Department within 30 days of the close of the public comment period.

The notification shall specify the regulatory criteria that have not been met by that portion. The Regulatory Review Act sets forth detailed procedures for review of these objections by the Department, the General Assembly and the Governor prior to the final publication of the proposed rulemaking.

- (1) The act.
- (2) The Food Act.
- (3) A provision of this chapter.

(b) *Specific references to applicable provisions of the Grade "A" PMO.* The provisions of this chapter contain, as guidance, references to the applicable provisions of the Grade "A" PMO.

§ 59a.12. Permits.

(a) *Permit required.* A person may not sell milk, milk products or manufactured dairy products within this Commonwealth without having a current, valid permit from the Secretary, unless the person is exempt from this permit requirement under subsection (b). A separate permit shall be obtained for each milk plant, milk distributor, receiving station, transfer station and bulk tank unit, and by every producer of raw milk in accordance with Subchapter F (relating to raw milk for human consumption).

(b) *Exceptions.* The permit requirement of subsection (a) does not apply to the following:

- (1) A person selling or delivering milk directly from a dairy farm to a milk plant.
- (2) A dairy farm producing and selling milk for pasteurization or milk for manufacturing.
- (3) A person selling milk or milk products from a store, when the milk or milk products have been purchased from a person already in possession of a permit to sell milk or milk products.

(4) A hotel, restaurant, soda fountain, boarding house or other place when milk or milk products are to be consumed on-premises, and have been purchased from a person already in possession of a permit to sell milk or milk products.

(5) A person producing and selling milk from a single cow, and exempted from the permit requirement in accordance with the act.

(c) *Obtaining a permit.* A person seeking a permit may obtain a permit application and additional information by contacting the Department as described in § 59a.3 (relating to contacting the Department). An entity that meets the requirements of § 59a.25 (relating to milk, milk products and manufactured dairy products from points outside this Commonwealth) will be issued a permit.

(d) *Requirements for initial issuance of permit.* Within 30 days of receiving a complete application for an initial permit, the Department will inspect the applicant's operation to determine whether it is in compliance with the standards of the act and this chapter that would be applicable if the applicant received the permit applied for. These standards shall be met for the Department to issue the permit.

(e) *Requirements for issuance of a successor permit.* If an applicant seeks a permit that is to take effect upon the expiration of a predecessor permit, the Department will approve the permit application if the dairy operation and the milk, milk products or manufactured dairy products produced from that dairy operation meet the requirements of the act and this chapter.

(f) *Duration of permit.* A permit will be valid for no more than 1 year. Each permit will expire as of September 1 each year, unless revoked or suspended earlier by the Department.

(g) *Ownership of milk permit.* A permit is and remains the property of the Department—even when it is in the physical custody of the permitholder. If a milk permit is suspended or revoked, the person in possession of the milk permit shall immediately return or surrender that permit to the Department. In the case of a permit suspension, the Department will promptly return the permit to the permitholder at the end of the suspension period.

(h) *Refusal, revocation or suspension of a permit.*

(1) *Authority.* The Department may refuse, revoke or suspend a permit issued under the act or this section upon a finding that the applicant or permitholder has violated a provision of the act or this chapter.

(2) *Notice and opportunity for a hearing.* The Department will notify an applicant or permitholder of a proposed refusal, revocation or suspension of a permit by written notification, and will deliver it by personal service or certified mail. The notice will afford the recipient at least 5 days within which to request an administrative hearing on the proposed action. If no hearing is requested, the Department may enter its final order refusing, suspending or revoking the permit. If a hearing is requested, the Department will conduct the hearing within 30 days of receipt of the request.

(1) A permitholder seeking the Department's approval of a milk, PMO-defined milk product, milk product or manufactured dairy product label shall apply to the Department at the address provided in § 59a.3 (relating to contacting the Department). The applicant may use an application form that the Department will provide upon request, or may apply by letter requesting label approval. The application must include clear, accurate copies of all labels for which approval is sought.

(2) The Department will approve the use of a milk, PMO-defined milk product, milk product or manufactured dairy product label if it meets the requirements of the act and this chapter, including the specific requirements of this section.

(3) The Department will, within 10 business days of receiving a complete application, mail the applicant its written approval or denial of the application.

(i) If the application is denied, the written denial will set forth the basis for denial, and afford the applicant notice and opportunity for an administrative hearing on the denial.

(ii) If the application is granted, the written approval will contain a copy of the label and assign a unique serial number to each label approved under the application. The Department will retain copies of these approvals.

(c) *Changes of approved labels.* If a label is approved under this section, colors and graphics may be changed without requiring reapproval of the label. If the text, type

size or wording is to be changed, the label shall be submitted to the Department for approval in accordance with subsection (b).

In addition, these requirements do not apply to cans of raw milk from individual dairy farms, which must be identified by name or number of the producer.

(f) *False or misleading material.* False or misleading marks, words or endorsements upon the label are prohibited. In determining whether labeling is false or misleading, the Department will take into account not only the specific representations made on the label but also the extent to which the labeling fails to reveal facts that are material in light of such representations. The Department may issue guidance documents addressing false or misleading label statements or any other aspect of labeling under this section. Registered trade designs or terms may be permitted on the container cap or label provided they are not misleading and do not obscure the required labeling.

(g) *Reference to applicable provisions of the Grade "A" PMO.* The provisions of the Grade "A" PMO and, in particular, section 4 of that document, regarding labeling, apply to this section, to the extent described in § 59a.11 (relating to adoption of Grade "A" PMO).

§ 59a.15. Labeling: Milk dating.

(a) *Label requirement.* The cap or nonglass container of pasteurized milk held in retail food stores, restaurants, schools or similar food establishments for resale shall be conspicuously and legibly marked in a contrasting color with the designation of the "sell-by" date—the month and day of the month after which the product may not be sold or offered for sale. The designation may be numerical—such as "8-15"—or with the use of an abbreviation for the month, such as "AUG 15 or AU 15." The words "Sell by" or "Not to be sold after" must precede the designation of the date, or the statement "Not to be sold after the date stamped above" must appear legibly on the container. This designation of the date may not exceed 17 days beginning after midnight on the day on which the milk was pasteurized.

(b) *Prominence of sell-by date on label.* The sell-by date shall be separate and distinct from any other number, letter or intervening material on the cap or nonglass container.

(c) *Prohibition.* Pasteurized milk may not be sold or offered for sale if the milk is sold or offered for sale after the sell-by date designated on the container.

(d) *Exemption.* The following pasteurized dairy products are exempt from the requirements of this section, provided that the cap or container of all pasteurized dairy products contains, a lot number or manufacturing date code that is acceptable to the Department and can be used for product traceability in the marketplace.

- (1) Ultrapasteurized dairy products.
- (2) Cultured dairy products.
- (3) Aseptically processed dairy products.
- (4) Dairy products that have undergone higher heat shorter time pasteurization.
- (5) Milk sold or offered for retail sale on the same premises at which it was processed.

(e) *Monitoring by the Department.*

(1) The Department will periodically sample containers of pasteurized milk in the possession of the processor or distributor. This sampling may occur at any time before the pasteurized milk is delivered to the store or the customer. The Department will sample at least one milk product from each processor each calendar year.

(2) The samples described in paragraph (1) will be analyzed by the Department or a Pennsylvania-approved dairy laboratory, applying a methodology in the most current edition of Dairy Practices Council Guideline No. 10, entitled "Guidelines for Maintaining and Testing Fluid Milk Shelf Life," to determine whether the bacterial test results exceed the bacterial limits for pasteurized milk described in § 59a.21 (relating to standards) prior to the expiration of the sell-by date designated on the retail container.

(3) When two or more samples demonstrate a processor cannot produce pasteurized milk that remains consistently within the bacterial limits referenced in paragraph (2) during a 17-day sell-by period, the Department will require a processor to use a sell-by date of something less than the 17-day period described in subsection (a). The Department will calculate this revised sell-by date so that bacterial growth in the milk will not exceed the referenced bacterial limits within that sell-by period if the milk is maintained in accordance with the temperature standards for pasteurized milk in § 59a.21.

(4) A processor may submit samples to the Department for analysis to obtain approval to resume a 17-day sell-by period for the product sampled. The Department will approve resumption of a 17-day sell-by period when analysis of a sample demonstrates that bacterial growth in the milk will not exceed the referenced bacterial limits within that sell-by period if the milk is maintained in accordance with the temperature standards for pasteurized milk in § 59a.21.

§ 59a.16. Markings, sealing and documentation for vehicles containing milk and milk products.

(a) *Marking requirements.* A vehicle or milk tank truck containing milk or milk products shall be legibly marked with the name and address of the milk plant or hauler in possession of the contents.

(c) *Noncertified milk plants and transfer stations.* Milk plants that are not certified under the NCIMS Interstate Milk Shippers Program, and which do not receive Grade "A" milk, shall obtain a representative sample of commingled milk for pasteurization each processing day. The sample shall be collected by certified industry plant sampler and analyzed for *Beta lactam* drug residues in an approved laboratory.

(d) *Drug residue testing.* Drug residue screening shall be completed at the direction of the Department and records of the testing shall be maintained on file by the permitholder.

§ 59a.106. Basis.

The quality classification of raw milk for manufacturing purposes shall be based on an organoleptic examination for appearance and odor, a drug residue test and quality control tests for sediment content, bacterial estimate and somatic cell count.

§ 59a.107. Appearance and odor.

The appearance of acceptable raw milk for manufacturing purposes must be normal and free of excessive coarse sediment when examined visually or by an acceptable test

procedure. The milk may not show any abnormal condition including curdles, ropy, bloody or mastitic conditions, as indicated by sight or other test procedures. The odor must be fresh and sweet. The milk must be free from objectionable feed and other off-odors that would adversely affect the finished product.

§ 59a.108. Sediment content classification.

(a) *Method of testing.* Methods for determining the sediment content of the milk of individual producers shall be those described in the *Standard Methods for the Examination of Dairy Products*. Sediment content must be based on comparison with applicable charts of the United States Sediment Standards for Milk and Milk Products. These charts are available from the Dairy Standardization Branch, Dairy Programs, Agricultural Marketing Service, United States Department of Agriculture, Room 2746-South, 1400 Independence Avenue, S.W., Washington, D.C. 20250-0230.

(b) *Classifications.* Milk shall be classified for sediment content in accordance with the USDA Sediment Standard, regardless of the results of the appearance and odor examination described in § 59a.107 (relating to appearance and odor), as set forth in this subsection. The USDA Sediment Standard defines the following classifications:

(1) Milk classified as "No. 1" has a tested sediment content that does not exceed 0.50 mg. or equivalent, and is acceptable.

(2) Milk classified as "No. 2" has a tested sediment content that does not exceed 1.50 mg. or equivalent, and is acceptable.

(3) Milk classified as "No. 3" has a tested sediment content that does not exceed 2.50 mg. or equivalent, and is probational for not more than 10 days.

(4) Milk classified as "No. 4" has a tested sediment content that exceeds 2.50 mg. or equivalent, and is rejected.

(c) *Frequency of tests.* At least once each month, at irregular intervals, the milk from each producer shall be tested as follows:

(1) *Milk in cans.* A sample shall be taken from one or more cans of milk selected at random from each producer.

(2) *Milk in farm bulk tanks.* A sample shall be taken from each farm bulk tank.

(d) *Acceptance or rejection of milk.*

(1) If the sediment disc is classified as No. 1, No. 2 or No. 3, the producer's milk may be accepted.

(2) If the sediment disc is classified as No. 4, the milk shall be rejected.

(3) If the shipment of milk is commingled with other milk in a transport tank, the next shipment may not be accepted until its quality has been determined at the farm before being picked up. If the person making the test is unable to get to the farm before the next shipment, it may be accepted but no further shipments shall be accepted unless the milk meets the requirements of No. 3 or better. In the case of milk classified as No. 3 or No. 4, if in cans, all cans shall be tested. Producers of No. 3 or No. 4 milk—cans or bulk—shall be notified immediately and shall be furnished applicable sediment discs and the next shipment shall be tested.

(e) *Retests.* On tests of the next shipment (if in cans, all cans shall be tested) milk classified as No. 1, No. 2 or No. 3, may be accepted, but No. 4 milk shall be rejected. Retests of bulk milk classified as No. 4 shall be made at

the farm before pickup. The producers of No. 3 or No. 4 milk shall be notified immediately, furnished applicable sediment discs and the next shipment shall be tested. This procedure of retesting successive shipments and accepting probational (No. 3) milk and rejecting No. 4 milk may be continued for a period not to exceed 10 calendar days. If, at the end of this time, all of the producer's milk does not meet the acceptable sediment content classification (No. 1 or No. 2), it shall be excluded from market.

§ 59a.109. Bacterial estimate classification.

(a) *General testing requirement.* A laboratory examination to determine the bacterial estimate shall be made on each producer's milk at least once each month at irregular intervals. Samples shall be analyzed at a Pennsylvania-approved dairy laboratory.

(b) *Testing methods.* Milk shall be tested for bacterial estimate by using one of the following methods or by any other method approved by the *Standard Methods for the Examination of Dairy Products*, and include the following:

- (1) Direct microscopic clump count.
- (2) Standard plate count.
- (3) Plate loop count.
- (4) Bactoscan™ count.
- (5) Pectin gel plate count.
- (6) Petrifilm™ aerobic count.
- (7) Spiral plate count.
- (8) Hydrophobic grid membrane filter count.
- (9) Impedance/conductance count.

(10) Other tests that have been approved by the Department through publication of notice in the *Pennsylvania Bulletin*.

(c) *Excessive bacteria.* Whenever the bacterial estimate indicates the presence of more than 500,000 bacteria per milliliter, the Pennsylvania-approved dairy laboratory shall do the following:

(1) Provide the producer with a warning of the excessive bacterial estimate. This warning need not be written.

(2) Notify the Department and provide the producer a written warning notice if two of the last four consecutive bacterial estimates exceed 500,000 per milliliter. The notice must be in effect so long as two of the last four consecutive samples exceed 500,000 per milliliter.

(d) *Excluding milk with excessive bacteria from the market.* If a producer receives the written notice described in subsection (c)(2), the producer shall have an additional sample taken between 3 and 21 days after receiving the notice. If this sample also exceeds 500,000 per milliliter, subsequent milkings shall be excluded from the market until satisfactory compliance is obtained. Shipment may be resumed and a temporary status assigned to the producer by the Department when an additional sample of herd milk is tested and found satisfactory. The producer shall be assigned a full reinstatement status when three out of four consecutive bacterial estimates do not exceed 500,000 per milliliter. The samples shall be taken at a rate of not more than two per week on separate days within a 3-week period.

§ 59a.110. Somatic cell count.

(a) *General testing requirement.* A laboratory examination to determine the level of somatic cells shall be made

on each producer's milk at least once each month. Samples shall be analyzed at a Pennsylvania-approved dairy laboratory.

(b) *Testing methods.* Milk shall be tested for somatic cell content by using one of the following procedures:

(1) Direct Microscopic Somatic Cell Count (Single Strip Procedure).

(2) Electronic Somatic Cell Count.

(3) Flow Cytometry/Opto-Electronic Somatic Cell Count.

(4) Membrane Filter DNA Somatic Cell Count.

(c) *Excessive somatic cell count.* Whenever the official test indicates the presence of more than 750,000 somatic cells per milliliter, the Pennsylvania-approved dairy laboratory shall do the following:

(1) Provide the producer with a warning of the excessive somatic cell count.

(2) Notify the Department and provide the producer a written warning notice if two of the last four consecutive somatic cell counts exceed 750,000 per milliliter. The notice must be in effect so long as two of the last four consecutive samples exceed 750,000 per milliliter.

(d) *Excluding milk with an excessive somatic cell count from the market.* If a producer receives the written notice described in subsection (c)(2), the producer shall have an additional sample taken between 3 and 21 days after receiving the notice. If this sample also exceeds 750,000 per milliliter, subsequent milkings shall be excluded from the market until satisfactory compliance is obtained. Shipment may be resumed and a temporary status assigned to the producer by the Department when an additional sample of herd milk is tested and found satisfactory. The producer shall be assigned a full reinstatement status when three out of four consecutive somatic cell count tests do not exceed 750,000 per milliliter. The samples shall be taken at a rate of not more than two per week on separate days within a 3-week period.

§ 59a.111. Drug residue level.

(a) *Industry responsibilities.*

(1) *Sampling and testing program.*

(i) Milk shipped for processing or intended to be processed on the farm where it was produced shall be sampled and tested, prior to processing, for *beta lactam* drug residue. Collection, handling and testing of samples shall be done according to procedures established by the Department in this section, and in accordance with Appendix N of the Grade "A" PMO, regarding drug residue testing and farm surveillance.

(ii) When so specified by the FDA, milk shipped for processing, or intended to be processed on the farm where it was produced, shall be sampled and tested, prior to processing, for other drug residues under a random drug sampling program. The random drug sampling program must include at least four samples collected in at least 4 separate months during any consecutive 6-month period.

(iii) When the Commissioner of the FDA determines that a potential problem exists with an animal drug residue or other contaminant in the milk supply, a sampling and testing program shall be conducted, as determined by the FDA. The testing shall continue until the Commissioner of the FDA determines with reasonable assurance that the potential problem has been remedied.

(iv) The dairy industry shall analyze samples for *beta lactams* and other drug residues by methods which have been independently evaluated or evaluated by the FDA and accepted by the FDA as effective to detect drug residues at current safe or tolerance levels. Safe and tolerance levels for particular drugs are established by the FDA.

(v) Sample test results for milk that does not test positive shall be recorded. The test result records shall be retained for 6 months.

(2) *Individual producer sampling.*

(i) *Bulk milk.* A milk sample for *beta lactam* drug residue testing shall be taken at each farm and include milk from each farm bulk tank.

(ii) *Can milk.* A milk sample for *beta lactam* drug residue testing shall be formed separately at the receiving plant for each can milk producer included in a delivery, and shall be representative of all milk received from the producer.

(iii) *Producer/processor.* A milk sample for *beta lactam* drug residue testing shall be formed separately according to subparagraphs (i) and (ii) for milk produced or received by a producer/processor.

(3) *Load sampling and testing.*

(i) *Bulk milk.* A load sample shall be taken from the bulk milk pickup tanker after its arrival at the plant and prior to further commingling.

(ii) *Can milk.* A load sample representing all of the milk received on a shipment shall be formed at the plant, using a sampling procedure that includes milk from every can on the vehicle.

(iii) *Producer/processor.* A load sample shall be formed at the plant using a sampling procedure that includes all milk produced and received.

(4) *Sample and record retention.* A load sample that tests positive for drug residue shall be retained for at least 12 months. The records of all positive sample test results shall be retained for at least 12 months.

(5) *Industry follow-up.*

(i) When a load sample tests positive for drug residue, industry personnel shall notify the Department immediately of the positive test result and of the intended disposition of the shipment of milk containing the drug residue. Milk testing positive for drug residue shall be disposed of in a manner that removes it from the human or animal food chain, except when acceptably reconditioned under FDA compliance policy guidelines.

(ii) Each individual producer sample represented in the positive-testing load sample shall be individually tested as directed by the Department to determine the producer of the milk sample testing positive for drug residue. Identification of the producer responsible for producing the milk testing positive for drug residue, and details of the final disposition of the shipment of milk containing the drug residue, shall be reported immediately to the Department.

(iii) Milk shipment from the producer identified as the source of milk testing positive for drug residue shall cease immediately and may resume only after a sample from a subsequent milking does not test positive for drug residue.

(b) *Responsibilities of the Department.*

(1) *Monitoring and surveillance.* The Department will monitor the milk industry's drug residue program by conducting unannounced onsite inspections to observe testing and sampling procedures and to collect samples for comparison drug residue testing. In addition, the Department will review industry records for compliance with drug residue program requirements. The review will seek to determine that the following conditions are met:

(i) Each producer is included in a routine, effective drug residue milk monitoring program utilizing methods evaluated and found acceptable by FDA to test samples for the presence of drug residue.

(ii) The Department receives prompt notification from industry personnel of each occurrence of a sample testing positive for drug residue, and of the identity of each producer identified as a source of milk testing positive for drug residue.

(iii) The Department receives prompt notification from industry personnel of the intended and final disposition of milk testing positive for drug residue, and that disposal of the load is conducted in a manner that removes it from the human or animal food chain, except when acceptably reconditioned under FDA compliance policy guidelines.

(iv) Milk shipment from a producer identified as a source of milk testing positive for drug residue completely and immediately ceases until a milk sample taken from the dairy herd does not test positive for drug residue.

(2) *Enforcement.*

(i) Any time milk is found to test positive for drug residue, the Department will immediately take action to suspend the producer's milk shipping privileges to prevent the sale of milk from the producer shipping milk testing positive for drug residue.

(ii) The producer's milk shipping privileges may be reinstated when a representative sample taken from the producer's milk, prior to commingling with any other milk, is no longer positive for drug residue.

(iii) The penalty shall be for the value of all milk on the contaminated load plus any costs associated with the disposition of the contaminated load. The Department may accept certification from the violative producer's milk marketing cooperative or purchaser of milk as satisfying the penalty requirements.

(iv) Whenever a drug residue test is positive, an investigation shall be made to determine the cause. Action shall be taken to prevent future occurrences.

(v) If a producer ships milk testing positive for drug residue three times within a 12-month period, the Department will initiate administrative procedures to suspend the producer's milk shipping privileges according to State policy.

(vi) The actions and procedures of the Department will be in accordance with this chapter and Appendix N of the Grade "A" PMO, regarding drug residue testing and farm surveillance.

§ 59a.112. Rejected milk.

(a) *Rejection requirement.* A plant shall reject specific milk from a producer if it fails to meet the requirements under § 59a.107 (relating to appearance and odor), if it is classified No. 4 for sediment content, or if it tests positive for drug residue.

(b) *Tagging and coloring rejected milk.* Rejected milk shall be identified with a reject tag and colored with harmless food coloring.

§ 59a.113. Suspended milk for manufacturing.

A plant may not accept milk from a producer if one of the following occurs:

(1) The producer's initial milk shipment to a plant is classified as No. 3 for sediment content, as described in § 59a.108 (relating to sediment content classification).

(2) The milk has been in a probational (No. 3) sediment content classification for more than 10-calendar days.

(3) Three of the last five milk samples have exceeded the maximum bacterial estimate of 500,000 per milliliter, as described in § 59a.109 (relating to bacterial estimate classification).

(4) Three of the last five milk samples have exceeded the maximum somatic cell count level of 750,000 per milliliter, as described in § 59a.110 (relating to somatic cell count).

(5) The producer's milk shipments to either the Grade "A" milk market or the manufacturing grade milk market are currently prohibited due to a positive drug residue test.

(6) The milk contains added water. For purposes of this requirement, samples analyzed for added water and found to have a freezing point above -0.525° F (0.508° C) shall be considered adulterated unless proven free of added water.

§ 59a.114. Inspection and quality testing of milk from producers.

(a) *Inspections.* Inspections shall be as follows:

(1) A dairy farm on which milk is produced for manufacturing purposes shall be inspected initially and have a passing score before the first milk is shipped.

(2) The dairy farm of a producer, on a change of market shall be inspected by an approved inspector and have a passing score before the first milk is shipped.

(3) Dairy farms shall be inspected at least once in each 6 month period by an approved inspector.

(b) *Testing of first shipment.* An examination and tests shall be made on the first shipment of milk from producers shipping milk to a plant for the first time or after a period of nonshipment. The milk must meet the following requirements:

(1) The requirements of § 59a.107 (relating to appearance and odor).

(2) The requirements of § 59a.108 (relating to sediment content classification).

(3) The requirements of § 59a.109 (relating to bacterial estimate classification).

(4) The requirements of § 59a.110 (relating to somatic cell count).

(5) The requirements of § 59a.111 (relating to drug residue level).

(c) *Testing of subsequent shipments.* For all shipments of milk not described in subsection (b), testing must meet the following requirements:

(1) The requirements of § 59a.107.

(2) The requirements of § 59a.108.

(3) The requirements of § 59a.109.

(4) The requirements of § 59a.110.

(5) The requirements of § 59a.111.

(d) *Transfer producers.* When a producer discontinues milk delivery to one plant and begins delivery to a different plant, the following shall occur:

(1) The dairy farm shall be inspected by an approved inspector and have a passing score before milk is shipped.

(2) The new buyer shall do one of the following:

(i) Obtain quality control records from the previous buyer for the previous 12-month period to confirm from these records that the following conditions are met:

(A) The milk is currently classified "acceptable" for sediment.

(B) Three of the last five consecutive milk samples do not exceed the maximum bacterial estimate.

(C) Three of the last five consecutive milk samples do not exceed the maximum somatic cell count level requirements.

(D) The last shipment of milk received from the producer by the former plant did not test positive for drug residue.

(E) Milk shipments currently are not excluded from the market due to a positive drug residue test.

(ii) Examine and classify each transfer producer's first shipment of milk in accordance with subsection (b), and subsequently examine shipments with subsection (c).

(3) When a producer discontinues milk delivery at one plant and begins delivery at another plant for any reason, the new buyer may not accept the first milk delivery until he has requested from the previous buyer a copy of the record of the following:

(i) The producer's milk quality tests covering the preceding 12 months.

(ii) The producer's drug residue test results for the preceding 12 month period.

(iii) A copy of the current Dairy Farm Inspection Report.

(4) The previous buyer shall furnish the new buyer with the information within 24 hours after receipt of the request. A new buyer may accept a transfer producer's milk after making the request for records, but before receiving them, if the new buyer first confirms the producer's records verbally from the previous buyer. If verbal communication is used to ascertain the status of quality records, the new buyer shall send to the previous buyer, as soon as possible, a written confirmation of the conversation.

(5) If the new buyer fails to receive the quality records from the previous buyer, the new buyer shall report this fact to the Department.

§ 59a.115. Record of tests.

Accurate records of the results of the milk quality and drug residue tests for each producer shall be kept on file for at least 12 months and be available for examination by the Department.

§ 59a.116. Abnormal milk.

(a) *Certain milk to be excluded from human consumption.* Cows which show evidence of the secretion of abnormal milk in one or more quarters based on bacteriological, chemical or physical examination and cows which have been treated with or have consumed chemical, medicinal or radioactive agents which are capable of being secreted in the milk in excess of any established limits and which may be deleterious to human health

shall be milked last or with separate equipment and the milk may not be offered for sale for human consumption.

(b) *Medicinal agents.* Milk from cows being treated with medicinal agents may not be offered for sale for periods recommended by the attending veterinarian or as indicated on the package label of the medicinal agent.

(d) *Visibly abnormal milk and odorous milk.* Bloody, stringy, off-color milk or milk abnormal in sight and odor shall be handled and disposed of to preclude the infection of other cows, and the contamination of the utensils.

(e) *Equipment, utensils and containers.* Equipment, utensils and containers used for handling of abnormal milk may not be used for the handling of milk to be offered for sale unless they are first effectively cleaned and sanitized.

(f) *Poultry litter and recycled animal body discharges.* Poultry litter and recycled animal body discharges may not be fed to lactating dairy animals.

§ 59a.117. Animal health.

(a) *General health.* Animals in the herd shall be maintained in a healthy condition, and shall be properly fed and kept.

(b) *Tuberculin test.* The lactating animals shall be located in a modified accredited area, an accredited free state or an accredited free herd as determined by the United States Department of Agriculture. If the animals are not located in those areas, they shall be tested annually under the jurisdiction of that program. Additions to the herd shall be from an area or from herds meeting those same requirements.

(c) *Brucellosis test.* The lactating animals shall be located in states meeting Class B status, or Certified-Free Herds, or shall be involved in a milk ring test program or blood testing program under the current USDA Brucellosis Eradication Uniform Methods and Rules. (3) A permitholder shall promptly notify the Department of initial instatement, suspension or reinstatement of a producer from which milk for manufacturing is or was received. Identification of the producer, including name and address, shall be provided orally or by mail within 24 hours of the action.

§ 59a.202. Milking facilities and housing.

(a) *General requirements.* A milking barn or milking parlor of adequate size and arrangement shall be provided to permit normal sanitary milking operations. It shall be well lighted and ventilated, and the floors and gutters in the milking area shall be constructed of concrete or other impervious material. The facility shall be kept clean, the manure removed daily and stored to prevent access of lactating animals to accumulation thereof. Swine or fowl may not be permitted in the milking area. When a milking barn is used and horses are present, the horses shall be stalled in a separate area a sufficient distance from the milking area or separated by tight partitions.

(b) *Platforms and ramps.* If a milking barn or milking parlor has ramps and platforms that are used to elevate lactating animals, these ramps and platforms must be constructed of an impervious material such as steel. Wooden platforms and ramps are prohibited. Rubber mats may be used as long as they are not placed over a wooden platform.

(c) *Concentrates and feed storage.* Concentrates and feed, if stored in the building, shall be stored in a tightly covered box, bin or container.

(d) *Protection of exposed milk.* If milk is exposed during straining or transferring in the milking area, it shall be protected from falling particles from areas above the milk facility.

(e) *Yard requirements.* The yard or loafing area must be of ample size to prevent overcrowding, be drained to prevent forming of standing water pools, insofar as practicable, and kept clean.

§ 59a.203. Milking procedures.

(a) *Cleanliness of udders and flanks.* The udders and flanks of all lactating animals shall be kept clean. The udders and teats shall be washed or wiped immediately before milking with a clean, damp cloth or paper towel moistened with a sanitizing solution and wiped dry or by another sanitary method approved in writing by the Department.

(b) *Milker.* The milker's outer clothing must be clean and his hands clean and dry. A person with an infected cut or open sores on the person's hands or arms may not milk lactating animals, or handle milk or milk containers, utensils or equipment.

(c) *Equipment.* Milk stools, surcingles or antikickers shall be kept clean and properly stored. Dusty operations

may not be conducted immediately before or during milking. Strong flavored feeds may not be fed immediately before or during milking.

(d) *Abnormal milk.* In addition to the requirements of § 59a.116 (relating to abnormal milk), abnormal milk may not be squirted on the floor, on the platform or in the producer's hand. Producers shall also wash their hands after handling equipment and handling the teats and udders of animals producing abnormal milk.

§ 59a.204. Cooling and storage.

(a) *Milk in cans.* Milk in cans shall be cooled immediately after milking to 50° F or lower at the farm, and not exceed 55° F upon delivery to the plant, unless delivered to the plant within 2 hours after milking. (b) *Milk in farm bulk tanks.* Milk in farm bulk tanks shall be cooled to 40° F within 2 hours after milking. Cooled milk may not be allowed to rise above a temperature of 50° F by subsequent addition of milk to the bulk tank and shall be cooled at 45° F or lower at time of pick-up, and not exceed 50° F upon delivery to the plant. Maximum time of delivery of milk to a milk plant may not exceed 72 hours of initial milking.

§ 59a.205. Milkhouse or milkroom.

(a) *General requirements.* A milkhouse or milkroom shall be provided for handling and cooling milk and for washing, handling and storing the utensils and equipment. The milkhouse or milkroom must be conveniently located and properly constructed, lighted and ventilated. Other products may not be handled in the milkroom which would be likely to contaminate milk, or otherwise create a public health hazard.

(b) *Equipment and construction.* The milkroom must be equipped with a wash and rinse vat, utensil rack, milk cooling facilities and an adequate supply of hot water available for cleaning milking equipment. If a part of the barn or other building, it must be partitioned, screened and sealed to prevent the entrance of dust, flies or other contamination. The floor of the building must be of concrete or other impervious material and graded to provide proper drainage. The walls and ceilings must be constructed of smooth easily cleaned material. Outside doors must open outward and be self-closing, unless they are provided with tight-fitting screen doors that open outward or unless other effective means are provided to prevent the entrance of flies.

(c) *Farm bulk tanks.* If a farm bulk tank is used, the following requirements apply:

(1) The farm bulk tank shall be properly located in the milkhouse or milkroom for access to all areas for cleaning and servicing. It may not be located over a floor drain or under a ventilator.

(2) A small platform or slab constructed of concrete or other impervious material shall be provided outside the milkhouse, properly centered under a suitable port opening in the wall of the milkhouse. The opening shall be fitted with a tight, self-closing door. The truck approach to the milkhouse or milkroom must be properly graded and surfaced to prevent mud or pooling of water at the point of loading.

(d) *Trash, animals and fowl.* The milkhouse or milkroom and appurtenances shall be kept clean and free of trash, animals and fowl.

(e) *Farm chemicals and animal drugs.*

(1) Animal biologics and other drugs intended for treatment of animals, and insecticides approved for use in dairy operations, must be clearly labeled and used in accordance with label instructions, and stored in a manner which will prevent accidental contact with milk and milk contact surfaces.

(2) Only drugs that are approved by the FDA or biologics approved by the United States Department of Agriculture (USDA) for use in dairy animals that are properly labeled according to FDA or USDA regulations shall be administered to the animals.

(3) When drug storage is located in the milkroom, milkhouse or milking area, the drugs shall be stored in a closed, tight-fitting storage unit. The drugs shall further be segregated so that drugs labeled for use in lactating dairy animals are separated from drugs labeled for use in nonlactating dairy animals.

(4) Drugs labeled for use in nondairy animals may not be stored with drugs labeled for use in dairy animals. When drugs labeled for use in nondairy animals are stored in the barn, the drugs shall be located in an area of the barn separate from the milking area.

(5) Herbicides, fertilizers, pesticides and insecticides that are not approved for use in dairy operations may not be stored in the milkhouse, milkroom or milking area.

§ 59a.206. Utensils and equipment.

(a) *General requirements.* Utensils, milk cans, milking machines—including pipeline systems—rubber and rubber like parts and other equipment used in the handling of milk shall be maintained in good condition, be free from rust, open seams, milkstone or any unsanitary condition, and shall be washed, rinsed and drained after each milking, stored in suitable facilities, and sanitized immediately before use with a dairy equipment sanitizer that has been approved by the Environmental Protection Agency for use with dairy or food processing equipment, and that is used according to the label directions. New or replacement can lids must be umbrella type. New utensils and equipment must comply with applicable *3-A Sanitary Standards*.

(b) *Farm bulk tanks.* Farm bulk tanks must meet *3-A Sanitary Standards* for construction at the time of installation and be installed under § 59a.26 (relating to plans for construction and reconstruction).

(c) *Single service articles.* Single service articles shall be properly stored and may not be reused.

§ 59a.207. Water supply.

A dairy farm water supply shall be properly located, protected and operated, and shall be easily accessible, ample, and of safe, sanitary quality for the cleaning of dairy utensils and equipment. The water supply must come from a source which is approved by the Department; or from a spring, dug well, driven well, bored well, or drilled well, the water from which complies with the standards of the Department.

§ 59a.208. Sewage disposal.

House, milkhouse or milkroom and toilet wastes shall be disposed of in a manner that will not pollute the soil surface, contaminate the water supply or be conducive to the breeding of insects.

GENERAL REQUIREMENTS

§ 59a.301. Premises.

(a) *General.* The exterior premises of a manufacturing plant shall be kept in a clean and orderly condition, and be free from strong or foul odors, smoke or excessive air pollution. Construction and maintenance of driveways and adjacent plant traffic areas must be of concrete, asphalt or similar material to keep dust and mud to a minimum.

(b) *Surroundings.* The adjacent surroundings of a manufacturing plant must be free from refuse, rubbish and waste materials to prevent harborage of rodents, insects and other vermin.

(c) *Drainage.* A suitable drainage system shall be provided which will allow rapid drainage of all water from manufacturing plant buildings and driveways, including surface water around the plant and on the premises. The water shall be disposed of in a manner that prevents a nuisance or health hazard.

§ 59a.302. Buildings.

(a) *General.* Manufacturing plant buildings must be of sound construction and kept in good repair to prevent the entrance or harboring of rodents, birds, insects, vermin, dogs and cats. Service pipe openings through outside walls shall be effectively sealed around the opening or provided with tight metal collars.

(b) *Outside doors, windows and openings.* Openings to the outer air including doors, windows, skylights and transoms, shall be effectively protected or screened against the entrance of flies and other insects, rodents, birds, dust and dirt. Outside doors opening into processing rooms must be in good condition and fit properly. Hinged, outside screen doors must open outward. Doors and windows shall be kept clean and in good repair. Outside conveyor openings and other special-type outside openings shall be effectively protected to prevent the entrance of flies and rodents, by the use of doors, screens, flaps, fans or tunnels. Outside openings for sanitary pipelines shall be covered when not in use. On new construction, window sills should be slanted downward at a 45° angle.

(c) *Walls, ceilings, partitions and posts.* The walls, ceilings, partitions, posts of rooms in which milk or dairy products are processed, manufactured, handled, packaged or stored (except dry storage of packaged finished products and supplies) or in which utensils are washed and stored, must be smoothly finished with a suitable material of light color, which is substantially impervious to moisture and kept clean. They shall be refined as often as necessary to maintain a neat, clean surface.

(d) Floors.

(1) The floors of all rooms in which milk or dairy products are processed, manufactured, packaged or stored

or in which utensils are washed must be constructed of tile properly laid with impervious joint material, concrete or other equally impervious material. The floors must be smooth, kept in good repair, graded so that there will be no pools of standing water or milk products after flushing, and the openings to the drains must be equipped with traps properly constructed and kept in good repair. On new construction, bell-type traps may not be used. The plumbing shall be installed to prevent the backup of sewage into the drain lines and to the floor of the plant.

(2) Sound, smooth wood floors which can be kept clean, may be used in rooms where new containers and supplies and certain packaged finished products are stored.

(e) *Lighting and ventilation.* Lighting and ventilation must comply with the following:

(1) Light must be ample, natural or artificial, or both, of good quality and well distributed. Rooms in which dairy products are manufactured or packaged or where utensils are washed must have at least 30 foot-candles of light intensity on all working surfaces and at least 50 foot-candles of light intensity in areas where dairy products are graded or examined for condition and quality. In other rooms, there must be at least 5 foot-candles of light intensity when measured at a distance of 30 inches from the floor. Where contamination of a product by broken glass is possible, light bulbs, fluorescent tubes, fixtures, skylight or other glass suspended over the product must be protected against breakage.

(2) There must be adequate heating, ventilation or air conditioning for all rooms and compartments to permit maintenance of sanitary conditions. Exhaust or inlet fans, vents, hoods or temperature and humidity control facilities shall be provided where and when needed, to minimize or eliminate undesirable room temperatures, objectionable odors, moisture condensation or mold. Inlet fans shall be provided with an adequate air filtering device to eliminate dirt and dust from the incoming air. Ventilation systems shall be cleaned periodically as needed and maintained in good repair. Exhaust outlets must be screened or provided with self-closing louvers to prevent the entrance of insects when not in use.

(f) *Certain rooms and compartments.* Rooms and compartments in which raw material, packaging, ingredient supplies, or dairy products are handled, manufactured, packaged, or stored must be designed, constructed and maintained to assure desirable room temperatures and clean and orderly operating conditions free from objectionable odors and vapors. Enclosed bulk milk receiving rooms must be separated from the processing rooms by a partition. Rooms for receiving can milk must be separated from the processing rooms by a partition—partial or complete—by suitable arrangement of equipment or by allowing enough distance between receiving and processing operations to avoid possible contamination of milk or dairy products during manufacturing and handling. Processing rooms shall be kept free from equipment and materials not regularly used. Rooms and compartments must comply with the following:

(1) *Coolers and freezers.* Coolers and freezers where dairy products are stored must be clean, reasonably dry and maintained at the proper uniform temperature and humidity to adequately protect the product and minimize the growth of mold. Adequate circulation of air must be maintained at all times. They must be free from rodents, insects and pests. Shelves shall be kept clean and dry. Refrigeration units must have provisions for collecting and disposing of condensate.

(2) *Supply room.* The supply rooms used for the storing of packaging materials, containers and miscellaneous ingredients shall be kept clean, dry, orderly, free from insects, rodents, and mold and maintained in good repair. Items stored in supply rooms shall be adequately protected from dust, dirt, or other extraneous matter and arranged on racks, shelves or pallets to permit access to the supplies and cleaning and inspection of the room. Insecticides, rodenticides, cleaning compounds, and other nonfood products must be properly labeled and segregated, and stored in a separate room or cabinet away from milk, dairy products, ingredients or packaging supplies.

(3) *Boiler rooms, shop room and service areas.* The boiler rooms, shop room and service areas must be separated from other rooms where milk and dairy products are processed, manufactured, packaged, handled or stored. The rooms shall be kept orderly and reasonably free from dust and dirt.

(4) *Toilet and dressing rooms.* Adequate toilet and dressing rooms facilities must be conveniently located.

(i) Toilet rooms may not open directly into a room where milk or dairy products are processed, manufactured, packaged or stored. Doors must be self-closing. Ventilation must be provided by mechanical means or screened openings to the outer air. Fixtures shall be kept clean and in good repair.

(ii) Employees shall be furnished with a locker, or other suitable facility, and the lockers and dressing rooms shall be kept clean and orderly. Adequate handwashing facilities shall be provided and durable, legible signs shall be posted conspicuously in each toilet or dressing room directing employees to wash their hands before returning to work.

(5) *Laboratory.* The permit holder may establish its own laboratory to perform required tests on milk received as milk for manufacturing purposes. The laboratory must be adequately equipped and maintained and be properly staffed with qualified, trained personnel, to meet requirements established by the Department. If the permit holder does not establish its own laboratory, an existing approved laboratory is acceptable if services are conveniently available so that samples and results can be transmitted without delay.

(6) *Starter facilities.* Adequate sanitary facilities shall be provided for the handling of starter cultures.

(7) *Lunch rooms and eating areas.* When eating areas are provided, they shall be kept clean and orderly and not open directly into a room in which milk or dairy products are processed, manufactured or packaged. Signs shall be posted directing employees to wash their hands before returning to work.

§ 59a.303. Facilities.

(a) *Water supply.* There shall be an ample supply of both hot and cold water of safe and sanitary quality, with adequate facilities for its proper distribution throughout the plant, and protection against contamination and pollution. Water from other facilities, when approved in writing by the Department, may be used for boiler feed water and condenser water provided that the waterlines are completely separated from the waterlines carrying the sanitary water supply, and the equipment is so constructed and controlled to preclude contamination of product contact surfaces. There may be no cross connection between the safe water supply and any unsafe or questionable water supply, or any other source of pollu-

tion through which contamination of the safe water supply is possible. Bacteriological examination shall be made of the sanitary water supply at least twice a year, or as often as necessary to determine purity and suitability for use in manufacturing dairy products. The tests shall be made in a laboratory that is approved by the Department. The results of all water tests shall be kept on file at the plant for which the test was performed.

(b) *Drinking water.* Sanitary drinking water facilities shall be provided in the plant and shall be conveniently located.

(c) *Hand-washing facilities.* Convenient hand-washing facilities shall be provided, including hot and cold running water, soap or other detergents, and sanitary single-service towels or air dryers. The accommodations must be located in or adjacent to toilet and dressing rooms and also at other places in the plant that may be essential to the cleanliness of all personnel handling products. Vats for washing equipment or utensils may not be used as handwashing facilities. Self-closing metal or plastic containers shall be provided for used towels and other wastes.

(d) *Steam.* Steam shall be supplied in sufficient volume and pressure for satisfactory operation of each applicable piece of equipment. Culinary steam used in direct contact with milk or dairy products must be free from harmful substances or extraneous material and only nontoxic boiler compounds shall be used, or a secondary steam generator shall be used in which soft water is converted to steam and no boiler compounds are used. Steam traps, strainers and condensate traps shall be used wherever applicable to insure a satisfactory and safe steam supply. Culinary steam must comply with the current 3-A *Accepted Practices for a Method of Producing Culinary Steam*.

(e) *Air under pressure.* The method for supplying air under pressure which comes in contact with milk or dairy products or any product contact surface must comply with the current 3-A *Accepted Practices for Supplying Air Under Pressure*. The air used at the point of application must be free from volatile substances, volatiles which may impart any flavor or odor to the products, and extraneous or harmful substances.

(f) *Dairy waste.* Dairy wastes shall be properly disposed of from the plant and premises. The sewer system must have sufficient slope and capacity to readily remove all waste from the various processing operations. When a public sewer is not available, wastes shall be properly disposed of so as not to contaminate milk equipment or to create a nuisance or public health hazard. Containers used for the collection and holding of wastes shall be constructed of metal, plastic or other equally impervious material and kept covered with tight fitting lids and placed outside the plant on a concrete slab or on a rack raised at least 12 inches. Waste containers may be kept inside a suitably enclosed, clean and flyproof room. Solid wastes shall be disposed of regularly and the containers cleaned before reuse. Accumulation of dry wastepaper and cardboard shall be kept to a minimum.

§ 59a.304. Equipment and utensils.

(a) *General construction, repair and installation.*

(1) The equipment and utensils used for the processing of milk and manufacture of dairy products must be constructed to be readily demountable where necessary for cleaning and sanitizing. The product contact surfaces of all utensils and equipment such as holding tanks, pasteurizers, coolers, vats, agitators, pumps, sanitary

piping, and fittings or any specialized equipment must be constructed of stainless steel, or other equally corrosion-resistant material. Nonmetallic parts other than glass having product contact surfaces must meet the current *3-A Standards for Multiple-Use Plastic Materials* or the current *3-A Sanitary Standards for Multiple-Use Rubber, and Rubber-Like Materials Used as Product Contact Surfaces in Dairy Equipment*.

(2) Equipment and piping shall be designed and installed to be easily accessible for cleaning, and shall be kept in good repair, free from cracks and corroded surfaces. Parts or interior surfaces of equipment, pipes (except certain piping cleaned in place) or fittings, including valves and connections, must be accessible for inspection.

(3) CIP systems must comply with the current *3-A Sanitary Practices for Permanently Installed Sanitary Product, Pipelines, and Cleaning Systems Used in Milk and Milk Processing Plants*.

(b) *Weigh cans and receiving tanks.* Weigh cans and receiving tanks must meet the general requirements of this section, be easily accessible for cleaning both inside and outside and elevated above the floor and protected sufficiently with the necessary covers or baffles to prevent contamination from splash, condensate and drippage. When necessary to provide easy access for cleaning of floors and adjacent wall areas, the receiving tank must be equipped with wheels or casters to allow easy removal.

(c) *Can washers.* Can washers must have sufficient capacity and ability to discharge a clean, dry can and cover and shall be kept properly timed in accordance with the instructions of the manufacturer. The water and steam lines supplying the washer must maintain a reasonably uniform pressure and if necessary be equipped with pressure regulating valves.

(d) *Product storage tanks or vats.* Storage tanks or vats must be fully enclosed or tightly covered and well insulated. The entire interior surface, agitator and all appurtenances must be accessible for thorough cleaning and inspection. Any opening at the top of the tank or vat including the entrance of the shaft must be suitably protected against the entrance of dust, moisture, insects, oil or grease. The sight glasses, if used, must be sound, clean, and in good repair. Vats which have hinged covers must be designed so that moisture or dust on the surface cannot enter the vat when the covers are raised. If the storage tanks or vats are equipped with air agitation, the system must be of an approved type and properly installed in accordance with the current *3-A Accepted Practices for Supplying Air Under Pressure*. Storage tanks or vats intended to hold product for longer than approximately 8 hours must be equipped with adequate refrigeration or have adequate insulation, or both. New storage tanks or vats must meet the appropriate *3-A Sanitary Standards* and be equipped with thermometers in good operating order.

(e) *Separators.* Product contact surfaces of separators must be free from rust and pits and insofar as practicable be of stainless steel or other equally noncorrosive metals. New separators must meet the current *3-A Sanitary Standards for Centrifugal Separators and Clarifiers*.

surface. Sanitary seal assemblies at the shaft ends of coil vats must be of the removable type, except that existing equipment not provided with this type gland will be acceptable if the packing glands are maintained and operated without adverse effects. New or replacement units must be provided with removable packing glands. Dome-type pasteurizer agitators must be stainless steel except that any nonmetallic parts must meet the current *3-A Sanitary Standards for Plastic and Rubber or Rubber-like Materials*, as applicable. Each pasteurizer used for heating product at 165° F or lower for 30 minutes or less must be equipped with space heating equipment and the necessary thermometers to insure a temperature at least 5° F above that required for pasteurization of the product. There must be adequate means of controlling the temperature of the heating medium. Batch pasteurizers must have temperature indicating and recording devices, and meet the current *3-A Sanitary Standards for Non-Coil Type Batch Pasteurizers*.

(g) *High-temperature, short-time pasteurizers.* When pasteurization is intended or required, an approved timing pump or device recorder-controller, automatic flow diversion valve and holding tube or its equivalent, if not a part of the existing equipment, shall be installed on all HTST equipment used for pasteurization, to assure complete pasteurization. The entire facility must meet the current *3-A Accepted Practices for the Sanitary Construction, Installation, Testing, and Operation of High-Temperature, Short-Time Pasteurizers*. After the HTST unit has been tested according to the *3-A Accepted Practices*, the timing pump or device and the recorder controller shall be sealed at the correct setting to assure pasteurization. Sealing of the HTST unit shall be performed by the control authority having jurisdiction. The HTST pasteurizer shall be tested initially upon installation, and whenever any alteration or replacement is made which affects the proper operation of the instrument or device. When direct steam pasteurizers are used, the steam, prior to entering the product, shall be conducted through a steam strainer and a steam purifier equipped with a steam trap and only steam meeting the requirements for culinary steam shall be used.

(h) *Indicating thermometers.*

(1) Long-stem indicating thermometers which are accurate within 0.5° F, plus or minus, for the applicable temperature range, shall be provided for checking the temperature of pasteurization and cooling of products in vats and checking the accuracy of recording thermometers.

(2) Short-stem indicating thermometers, which are accurate within 0.5° F, plus or minus, for the applicable temperature range, shall be installed in the proper stationary position in all HTST, and dome-type pasteurizers. Storage tanks where temperature readings are required must have thermometers which are accurate within 2.0° F, plus or minus.

(3) Air-space indicating thermometers, where applicable, which are accurate within 1.0° F, plus or minus, for the proper temperature range shall also be installed above the surface of the products pasteurized in vats, to make certain that the temperature of the foam or air above the products pasteurized, or both, also received the required minimum temperature treatment.

(i) *Recording thermometers.*

(1) HTST recording thermometers that are accurate within 1° F, plus or minus, for the applicable temperature range, shall be used on each heat treating, pasteurizing or sterilizing unit to record the heating process.

(2) Additional use of recording thermometers accurate within 2° F, plus or minus, may be required where a record of temperature or time of cooling and holding is of significant importance.

(j) *Surface coolers.* Surface coolers must be equipped with hinged or removable covers for the protection of the product. The edges of the fins must be designed to divert condensate on nonproduct contact surfaces away from product contact surfaces. Gaskets or swivel connections must be leak proof.

(k) *Plate-type heat exchangers.* Plate-type heat exchangers must meet the current *3-A Sanitary Standards for Construction and Installation*. Gaskets must be tight and kept in good operating order. Plates shall be opened for inspection by the operator at sufficiently frequent intervals to determine if the equipment is clean and in satisfactory condition. A cleaning regimen shall be posted to insure proper cleaning procedures between inspection periods.

(n) *Homogenizers.* Homogenizers and high pressure pumps of the plunger type must meet the *3-A Sanitary Standards*.

(o) *New equipment and replacements.* New equipment and replacements, including all plastic parts and rubber and rubberlike materials for parts and gaskets having product contact surfaces, must meet the current *3-A Sanitary Standards* or *3-A Accepted Practices*. If *3-A Sanitary Standards* or *3-A Accepted Practices* are not available, the equipment and replacements must meet the general requirements of this section.

(p) *Certain vacuum chambers.* A vacuum chamber, as used for flavor control, must be made of stainless steel or other equally noncorrosive metal. The unit must be constructed to facilitate cleaning and product contact surfaces must be accessible for inspection. The chamber must be equipped with a vacuum breaker and a check valve at the product discharge line. Only steam which meets the requirements for culinary steam may be used. The incoming steam supply shall be regulated by an automatic solenoid valve which will cut off the steam supply in the event the flow diversion valve of the HTST pasteurizer is not in the forward flow position. Condensers when used must be equipped with a water level control and an automatic safety shutoff valve.

§ 59a.305. Personnel cleanliness.

Employees shall wash their hands before beginning work and upon returning to work after using toilet facilities, eating, smoking or otherwise soiling their hands. Employees shall keep their hands clean and follow good hygienic practices while on duty. Expectoration or use of tobacco in any form shall be prohibited in each room and compartment where any milk, dairy product or supplies are prepared, stored, or otherwise handled. Clean white or light-colored washable outer garments and caps (paper caps or hair nets acceptable) shall be worn by all persons engaged in receiving, testing, processing milk, manufacturing, packaging or handling dairy products.

§ 59a.306. Personnel health.

A person affected with any disease in a communicable form or while a carrier of the disease may not be permitted in any room or compartment where milk and dairy products are prepared, manufactured or otherwise handled. A person who has a discharging or infected wound, sore or lesion on hands, arms or other exposed portion of the body may not work in any dairy processing rooms or in any capacity resulting in contact with milk or dairy products. Each employee whose work brings him in contact with the processing or handling of dairy products, containers, or equipment shall have a medical and physical examination by a registered physician or by the local department of health at the time of employment. In addition an employee returning to work following illness from a communicable disease shall have a certificate from the attending physician to establish proof of complete recovery. Medical certificates attesting the fact that the employee when last examined was free from communicable disease shall be kept on file at the plant office.

§ 59a.307. Protection and transport of raw milk and cream.

(a) Equipment and facilities.

(1) *Milk cans.* Cans used in transporting milk from dairy farm to plant must be constructed to be easily cleaned, and shall be inspected, repaired and replaced as necessary to exclude substantially the use of cans and lids with open seams, cracks, rust, milkstone or any unsanitary condition.

(2) *Farm bulk tanks.* New farm bulk tanks must meet current *3-A Sanitary Standards* for construction and be installed in accordance with the requirements of the Grade "A" PMO.

(b) Transporting milk or cream.

(1) *Vehicles.* Vehicles used for the transportation of can milk or cream must be of the enclosed type, constructed and operated to protect the product from extreme temperature, dust, or other adverse conditions and kept clean. Decking boards or racks shall be provided where more than one tier of cans is carried. Cans, or bulk tanks on vehicles, used for the transportation of milk from the farm to the plant may not be used for any other purpose.

(2) *Transport tanks.* The exterior shell of transport tanks must be clean and free from open seams or cracks which would permit liquid to enter the jacket. The interior shell must be stainless steel and constructed so it will not buckle, sag or prevent complete drainage. Product contact surfaces must be smooth, easily cleaned and maintained in good repair. The pump and hose cabinet must be fully enclosed with tight fitting doors and the inlet and outlet must be provided with dust covers to give adequate protection from road dust. New and replacement transport tanks must meet the current *3-A Sanitary Standards for Stainless Steel Automotive Transportation Tanks for Bulk Delivery and/or Farm Pick-Up Service*.

(c) *Cleaning and sanitizing facilities.* Enclosed facilities shall be available for washing and sanitizing of transport tanks, piping and accessories, at central locations or at all plants that receive or ship milk or milk products in transport tanks.

(d) *Transfer of milk.* Milk shall be transferred under sanitary conditions from farm bulk tanks through stainless steel piping or approved tubing. The sanitary piping and tubing must be capped when not in use.

§ 59a.308. Raw product storage.

(a) *General.* Milk shall be held and processed under conditions and at temperatures that will avoid contamination and rapid deterioration. Drip milk from can washers or another source may not be used for the manufacture of dairy products. Bulk milk in storage tanks within the plant shall be handled to minimize bacterial increase and shall be maintained at 45° F or lower until processing begins. This does not preclude holding milk at higher temperatures for a period of time, when applicable to particular manufacturing or processing practices.

(b) *Bacteriological quality.* The bacteriological quality of commingled milk in storage tanks must be 1 million/ml or lower.

(c) *Sampling.* During any consecutive 6 months, at least four samples of commingled raw milk for processing will be taken by the Department, or a designated representative, from each plant.

(d) *Testing of samples.* A laboratory test of the samples described in subsection (c) shall be performed at a Pennsylvania-approved dairy laboratory, to determine the bacterial estimate.

(e) *Procedures if bacterial counts are high.* Whenever a bacterial estimate of commingled milk in a plant indicates the presence of more than 1 million per milliliter, the following procedures shall be applied:

(1) The Department will notify plant management with a warning of excessive bacterial estimate, and recommend that appropriate action be taken to eliminate the bacterial problem.

(2) Whenever two of the last four consecutive commingled milk bacterial estimates exceed 1 million per milliliter, the Department will notify plant management with a written warning notice. The notice will be in effect so long as two of the last four consecutive samples exceed 1 million per milliliter. Plant management should continue to work to eliminate the problem.

(3) An additional sample will be taken by the Department after a lapse of 3 days but within 21 days of the notice required in paragraph (1). If this sample also exceeds 1 million per milliliter, the Department may take action (such as permit suspension or acting to keep the milk from the market place) until an additional sample of commingled milk is tested and found satisfactory. A temporary status may be assigned to the plant by the Department when an additional sample of commingled milk is tested and found satisfactory. The plant will be assigned a full reinstatement status when three out of four consecutive commingled bacterial estimates do not exceed 1 million per milliliter. The samples will be taken at a rate of not more than two per week on separate days within a 3-week period.

(4) If a plant remains in temporary status in excess of 60 days, administrative procedures to suspend the plant's license will be taken by the Department until the plant complies with the bacteriological requirements.

(f) *Heat treated cream.* Heat treated cream is derived from the heating of raw milk, one time, to temperatures greater than 125° F but less than 161° F for separation purposes. When enzyme deactivation is necessary for a functional reason, the cream may be further heated to less than 166° F in a continuing heating process. The resulting bulk shipment of cream shall be cooled to 45° F or less, and labeled as heat treated with bacterial limits of 20,000 per ml or gm for dairy products which are weighed.

§ 59a.309. Pasteurized, ultrapasteurized or aseptically processed and packaged products.

Pasteurized, ultrapasteurized or aseptically processed and packaged products must conform with § 59a.2 (relating to definitions). When pasteurization or sterilization is intended or required, or when a product is designated "pasteurized" or "sterilized" every particle of the product shall be subjected to temperatures and holding periods that will assure proper pasteurization or sterilization of the product. The heat treatment by either process must be sufficient to insure public health safety and to assure adequate keeping quality, yet retaining the most desirable flavor and body characteristics of the finished product. The phenol value of test samples of pasteurized finished product may be no greater than the maximum specified for the particular product as determined and specified by the phosphatase test method prescribed in the latest edition of "Official Methods of Analysis of the Association of Official Agricultural Chemists" (a publication of the Association of Official Analytical Chemists International, 481 North Frederick Avenue, Suite 500, Gaithersburg, MD 20877-2417).

§ 59a.310. Composition and wholesomeness.

Necessary precautions shall be taken to prevent contamination or adulteration of the milk or dairy products during manufacturing. Substances and ingredients used in the processing or manufacturing of a dairy product will be subject to inspection and must be wholesome and practically free from impurities. The finished product must comply with the Food, Drug, and Cosmetic Act (21 U.S.C.A. §§ 301—399a) and applicable Commonwealth statutes as to their composition and wholesomeness.

§ 59a.311. Cleaning and sanitizing treatment.

(a) *Equipment and utensils.*

(1) The equipment, sanitary piping and utensils used in receiving and processing of the milk, and manufacturing and handling of the product shall be maintained in a sanitary condition. Sanitary seal assemblies must be removable on all agitators, pumps and vats, and shall be inspected at regular intervals and kept clean. Unless other provisions are recommended in the following supplemental sections, equipment not designed for CIP cleaning shall be disassembled after each day's use for thorough cleaning. Dairy cleaners, detergents, wetting agents, sanitizing agents or other similar materials which will not contaminate or adversely affect the products may be used. Steel wool or metal sponges may not be used in the cleaning of any dairy equipment or utensils. Utensils and portable equipment used in processing and manufacturing operations shall be stored above the floor in clean, dry locations and in a self draining position on racks constructed of impervious corrosion resistant material. All product contact surfaces shall be subjected to an effective sanitizing treatment immediately prior to use, except where dry cleaning is permitted. This sanitizing treatment shall entail subjection of a clean surface to steam, hot water, hot air, or an acceptable sanitizing solution for the destruction of most human pathogens and other vegetative microorganisms to a level considered safe for product production, without adversely affecting the equipment, the milk, the milk product or the health of consumers. Sanitizing solutions must comply with 21 CFR 178.1010 (relating to sanitizing solutions).

(2) CIP cleaning, including sprayball systems, shall be used only on equipment and pipeline systems which have been designed and engineered for that purpose. When that cleaning is used, careful attention must be given to

the proper procedures to assure satisfactory cleaning. CIP installations and cleaning procedures shall be in accordance with the current *3-A Accepted Practices for Permanently Installed Product and Solution Pipelines and Cleaning Systems Used in Milk and Milk Product Processing Plants*. The established cleaning procedure shall be posted and followed. Following the circulation of the cleaning solution, the equipment and lines shall be thoroughly rinsed and checked for effectiveness of cleaning. Caps, plugs, special fittings, valve seats, cross ends and tee ends shall be opened or removed and brushed clean. Immediately prior to starting the product flow, the product contact surfaces shall be properly sanitized.

(b) *Milk cans and can washers*. Milk cans and can washers must meet the following requirements:

(1) Milk cans and lids shall be cleaned, sanitized and dried before they are returned to producers. Inspection, repair, or replacement of cans and lids shall be adequate to substantially exclude from use cans and lids showing open seams, cracks, rust condition, milkstone or an unsanitary condition.

(2) Washers shall be maintained in a clean and satisfactory operating condition and kept free from accumulation of scale or debris which will adversely affect the efficiency of the washer.

(c) *Transport tanks*. An enclosed wash dock and cleaning and sanitizing facilities shall be available to all plants that receive or ship milk in tanks. Care shall be taken to prevent the entrance of cheese particles or ingredients after the cooker batch of cheese has reached the final heating temperature. After holding for the required period of time, the hot cheese shall be emptied from the cooker as quickly as possible.

(c) *Forming containers.* Containers either lined or unlined shall be assembled and stored in a sanitary manner to prevent contamination. The handling of containers by filler crews shall be done with extreme care and observance of personal cleanliness. Preforming and assembling of pouch liners and containers shall be kept to a minimum and the supply rotated to limit the length of time exposed to possible contamination prior to filling.

(d) *Filling containers.* Hot fluid cheese from the cookers may be held in hotwells or hoppers to assure a constant and even supply of processed cheese to the filler or slice former. Filler valves must effectively measure the desired amount of product into the pouch or container in a sanitary manner and must cut off sharply without drip or drag of cheese across the opening. An effective system shall be used to maintain accurate and precise weight control. Damaged or unsatisfactory packages shall be removed from production, and the cheese may be salvaged into sanitary containers, and added back to cookers.

(e) *Closing and sealing containers.* Pouches, liners or containers having product contact surfaces after filling shall be folded or closed and sealed in a sanitary manner, preferably by mechanical means, to assure against contamination. § 59a.401. Raw milk; General.

This subchapter prescribes the permitting, testing and inspection requirements that are applicable to persons seeking to sell raw milk for human consumption.

§ 59a.402. Raw milk; Prohibitions.

(a) *Sale of raw milk without permit.* A person may not sell raw milk for human consumption without having a current raw milk permit issued by the Department. The term "sell" includes the selling, exchanging, delivering, or having in possession, care, control, or custody with intent to sell, exchange, or deliver, or to offer or to expose for sale.

(b) *Actions authorized under a raw milk permit.* A raw milk permit authorizes the permitholder to lawfully produce and sell (within this Commonwealth) raw whole milk for human consumption. It also authorizes the permitholder to obtain an additional permit, issued by the Department under authority of 21 CFR 133.150 (relating to hard cheeses), authorizing the sale of aged cheese manufactured from raw milk.

(c) *Compliance with testing and documentation requirements.* A person may not sell raw milk without being in compliance with the testing and documentation requirements of this section.

§ 59a.403. Raw milk permit.

(a) *Application.* A raw milk permit application may be obtained by contacting the Department at the address set forth in § 59a.3 (relating to contacting the Department).

(b) *Duration.* A raw milk permit will be valid for no more than 1 year. Each raw milk permit will expire as of September 1 each year, unless revoked or suspended earlier by the Department.

(c) *Timing of filing to ensure Department review of an application for a successor raw milk permit.* If a raw milk permitholder wishes to obtain a raw milk permit to replace an expiring raw milk permit, the permitholder is encouraged, but is not required, to file an application for this successor raw milk permit with the Department by July 1 of the year in which the current raw milk permit is to expire. Compliance with this recommendation may help to prevent a lapse between the expiring raw milk permit and the effective date of the successor raw milk permit.

§ 59a.404. Requirements for the issuance of a raw milk permit.

(a) *Preissuance inspection.*

(1) *New raw milk permits.* Prior to issuing a raw milk permit, the Department will inspect the dairy farm that is the subject of a new raw milk permit application, to determine whether the dairy farm is in compliance with the act and this chapter. The dairy farm must be in passing condition to be eligible for a raw milk permit.

(2) *Successor raw milk permits.* If a raw milk permitholder applies to the Department for a successor raw milk permit, the Department may issue the raw milk permit without conducting the dairy farm inspection described in paragraph (1).

(b) *Confirmation of Tuberculosis-free and Brucellosis-free status.*

(1) *New raw milk permits.* An applicant for a new raw milk permit shall provide the Department confirmation that the animal or herd from which the raw milk is to be produced has been determined to be free from brucellosis and free from tuberculosis, in accordance with the process described in § 59a.406 (relating to animal health). This confirmation shall be provided for the subject dairy farm to be eligible for a raw milk permit.

(2) *Successor raw milk permits.* An applicant for a successor raw milk permit shall, at intervals of no greater than 13 months, provide the Department confirmation that the animal or herd from which the raw milk is to be produced has been determined to be free from brucellosis and tuberculosis by annual tests in accordance with the process described in § 59a.406.

(c) *General herd health.*

(1) *New raw milk permits.* An applicant for a new raw milk permit shall have a licensed veterinarian examine the herd and provide the Department a written report of this examination. The report must reflect that the herd is in good general health and free from communicable disease. This shall be done in accordance with § 59a.406.

(2) *Successor raw milk permits.* An applicant for a successor raw milk permit shall provide the Department a copy of a veterinary examination report as described in paragraph (1). The report must be dated within 1 year preceding the date of the application, and reflect that the herd is in general good health and free from communicable disease. The applicant shall continue to have this veterinary examination conducted on an annual basis, in accordance with § 59a.406.

(d) *Confirmation of safe water supply.*

(1) *New raw milk permits.* An applicant for a new raw milk permit shall have the dairy farm water supply tested, and provide the Department with confirmation that the water is bacteriologically safe, in accordance with § 59a.407 (relating to regular testing of water supply). Confirmation that the water supply is bacteriologically safe shall be provided for the subject dairy farm to be eligible for a raw milk permit. If the water supply is through a public or municipal water system, this testing requirement does not apply.

(2) *Successor raw milk permits.* An applicant for a successor raw milk permit shall provide the Department with a copy of a written laboratory report as described in paragraph (1). The report must be dated no earlier than 6 months preceding the date of the application, done in accordance with § 59a.407 and reflect that the dairy farm water supply is bacteriologically safe.

(e) *Sampling and testing.*

(1) *New raw milk permits.* An applicant for a new raw milk permit shall demonstrate its ability to produce raw milk for human consumption through the following process:

(i) The applicant shall have an approved sampler draw three separate samples of commingled milk. The samples shall be drawn at least 7 days apart, and be taken on an unannounced basis.

(ii) Each of these three samples described in subparagraph (i) shall be submitted to a Pennsylvania-approved dairy laboratory or the Department for analysis.

(iii) The analysis described in subparagraph (ii) will determine whether the sample meets the standards in § 59a.408 (relating to regular testing of raw milk).

(iv) If any of the three analyzed samples described in subparagraph (iii) violates or exceeds a standard in § 59a.408, the three-sample process shall repeat itself until three successive samples are in compliance with the referenced standards.

(v) If the first of the three required samples is tested as described in subparagraph (iii), and concludes that no pathogenic bacteria are present, the second and third samples need not be tested for the presence of pathogenic bacteria. If a sample test concludes that pathogenic bacteria are present, a raw milk permit will not be issued until two separate consecutive tests, from samples drawn at least 7 days apart, conclude that no pathogenic bacteria are present.

(2) *Successor raw milk permits.* An applicant for a successor raw milk permit shall demonstrate its ability to produce raw milk for human consumption through the regular sampling and testing process described in § 59a.408.

(f) *Location of packaging-related facilities and equipment.*

(1) *Containers owned by the customer.* If a dairy farm that is the subject of a raw milk permit or raw milk permit application packages raw milk for sale in containers that are owned by the customers, rather than by the permitholder, the Department will consider a milk room facility as being adequate for the packaging of this raw milk.

(2) *Containers owned by the raw milk permitholder.* If a dairy farm that is the subject of a raw milk permit or raw milk permit application packages raw milk for sale in containers that are owned by the permitholder, such as in prepackaged containers for consumer purchase, the dairy farm shall have separate rooms for bottling, single service container storage, and bottle washing. A mechanical means of filling and capping bottles shall be utilized for prepackaging, and the closure must protect the pouring lip to its largest diameter.

§ 59a.405. Sanitation.

A raw milk permitholder shall maintain and operate the subject dairy operation in compliance with the same sanitation and handling standards that are applicable to the production of milk for pasteurization, as set forth in § 59a.19 (relating to standards for grade "A" raw milk for pasteurization, ultra-pasteurization or aseptic processing) except to the extent any of those provisions are inconsistent with this subchapter. The provisions of the Grade "A" PMO and, in particular, the *Standards for Grade "A" Raw Milk for Pasteurization, Ultrapasteurization or Aseptic Processing* set forth in that document and section 7 of the Grade "A" PMO, regarding standards for Grade "A" milk and milk products, are incorporated by reference as regulations authorized under the act, to the extent they do not conflict with the act or this subchapter. § 59a.406. Animal health.

(a) *General.* A raw milk permitholder shall monitor the health of the animals from which the raw milk is produced, to ensure that they are in general good health and free of tuberculosis and brucellosis.

(b) *Confirmation of brucellosis-free status.*

(1) *Annual blood tests.* A raw milk permitholder shall, at intervals of no greater than 13 months, provide the Department confirmation from a licensed veterinarian that the animal or herd from which the raw milk is produced has been determined to be free from brucellosis by annual blood tests conducted in accordance with Chapter 7 (relating to brucellosis regulations).

The report must reflect that the herd is in good general health and free from communicable disease. The raw milk permitholder shall retain a copy of the written veterinarian's report for at least 3 years and shall, upon request of the Department, make the report available for inspection.

§ 59a.407. Regular testing of water supply.

(a) *General requirement of safe and sanitary water.* The water supply for a dairy operation that produces raw milk under a raw milk permit must be safe and sanitary.

(b) *Testing frequency.* The water supply for a dairy operation that produces raw milk under a raw milk permit shall be tested at least once every 6 months, and whenever any repair or alteration is made to the water

supply system. This testing shall be at the raw milk permitholder's expense. If the water supply is through a public or municipal water system, this testing requirement does not apply.

(c) *Testing standards.* The water tests described in this section shall be conducted at a qualified laboratory. The testing must include bacteriological examinations to determine whether the water is bacteriologically safe. The water supply must contain a Most Probable Number of Coliform Organisms (MPN) of less than 2.2-per-100-milliliters by the multiple tube fermentation method or less than 1-per-100-milliliters by the membrane filter technique or the chromogenic substrate technique. The water must otherwise be safe and sanitary.

(d) *Water test records.* The raw milk permitholder shall retain all records of required water tests, and make these available for inspection upon request of the Department.

§ 59a.408. Regular testing of raw milk.

(a) *Responsibility.* A raw milk permitholder shall be responsible to arrange for the regular sampling and testing required with respect to the raw milk permit, and to pay for this testing.

(b) *Testing laboratories.* Raw milk samples submitted for testing shall be analyzed at an official laboratory or a Pennsylvania-approved dairy laboratory.

(c) *Testing schedule and standards.* A raw milk permitholder shall coordinate raw milk testing on the following schedule, and the raw milk samples shall meet the following standards:

(2) If three of the last five tested raw milk samples exceed the bacterial count, somatic cell count or coliform count standards or cooling temperature requirements described in § 59a.408, the Department will proceed to revoke or suspend the raw milk permit, and the raw milk permit-holder shall be subject to summary criminal prosecution under the act.

(b) *Pesticides.* If a raw milk sample tests positive for the presence of a pesticide, the raw milk permit-holder shall do all of the following:

(1) Immediately cease the sale of raw milk for human consumption.

(2) Take a second sample and submit it for testing for pesticide residue.

(3) Investigate and determine the cause of the contamination, report the result of that investigation to the Department, and correct that cause of contamination.

(5) Refrain from selling raw milk until and unless two consecutive tests, from samples drawn at least 1 day apart, show that raw milk produced at the dairy operation that is the subject of the raw milk permit is free from disease-producing organisms, and the Department reviews these test results and approves the resumption of raw milk sales.

§ 59a.410. Location of raw milk packaging facilities on the dairy farm.

(a) *Containers owned by the raw milk permit-holder.* If raw milk is packaged for sale in containers that are owned by the raw milk permit-holder (such as in prepackaged containers for consumer purchase), the dairy farm shall have separate rooms for bottling, single service container storage, and bottle washing, as applicable. A mechanical means of filling and capping bottles shall be utilized for prepackaging, and the closure must protect the pouring lip to its largest diameter.

(b) *Containers owned by the customer.* If raw milk is packaged for sale in containers that are owned by the consumer, the Department will consider a milk room facility as being adequate for the packaging of this raw milk.

§ 59a.411. Label content review by the Department.

(a) *Raw milk in containers owned by the raw milk permit-holder.*

(1) *General label statements.* If raw milk is packed for sale in containers that are owned by the raw milk permit-holder, the labeling on these containers and caps shall be submitted to the Department and approved by the Department prior to use in commerce. The container must be labeled as raw milk, and include the net weight as well as the name and address of the distributor or producer and the words "Keep Refrigerated." It may not be misbranded or contain any false or misleading statements.

(2) *Consumer advisory for raw animal-derived foods that have not been processed to remove pathogens.*

(i) In addition to the information described in paragraph (1), the label must contain a consumer advisory statement to notify consumers of the increased risks (particularly to certain highly susceptible populations) associated with the consumption of raw animal-derived foods that have not been processed to remove pathogens. An acceptable notice would be as follows:

Raw milk has not been processed to remove pathogens that can cause illness. The consumption of raw milk may significantly increase the risk of foodborne illness in persons who consume it - particularly with respect to certain highly-susceptible populations such as preschool-age children, older adults, pregnant women, persons experiencing illness, and other people with weakened immune systems.

(ii) The Department will consider alternative written means of notification of consumers of the potential risks associated with the consumption of raw milk by highly-susceptible populations.

(3) *Label requirement: milk dating.*

(i) *Requirement.* The cap of the raw milk container, or the container itself, must be conspicuously and legibly marked in a contrasting color with the designation of the "sell-by" date—the month and day of the month after which the raw milk may not be sold or offered for sale. The designation may be numerical—such as "8-15"—or with the use of an abbreviation for the month, such as "AUG 15" or "AU 15." The words "Sell by" or "Not to be sold after" must precede the designation of the date, or the statement "Not to be sold after the date stamped above" must appear legibly on the container. This designation of the date may not exceed 17 days beginning after midnight on the day on which the raw milk was produced.

(ii) *Prominence of sell-by date on label.* The sell-by date must be separate and distinct from any other number, letter or intervening material on the cap or container.

(iii) *Prohibition.* Raw milk may not be sold or offered for sale for human consumption if the raw milk is sold or offered for sale after the sell-by date designated on the container.

(iv) *Monitoring by the Department.*

(A) The Department will periodically sample containers of raw milk in the possession of the raw milk permit-holder or a distributor. This sampling may occur at any time before the raw milk is delivered to the customer. The Department will take at least one sample of raw milk from each raw milk permit-holder each calendar year.

(B) The samples described in clause (A) shall be analyzed by the Department or a Pennsylvania-approved dairy laboratory, to determine whether bacterial test results exceed the bacterial limits for raw milk described in the Raw Milk Testing Schedule and Standards set

forth in § 59a.408 (relating to regular testing of raw milk) prior to the expiration of the sell-by date designated on the raw milk container.

(C) When two or more samples demonstrate a raw milk permit-holder cannot produce raw milk that remains consistently within the bacterial limits referenced in clause (B) through the sell-by date marked on the container, the Department will require a raw milk permit-holder to use a shorter sell-by date specified by the Department. The Department will calculate this revised sell-by date so that bacterial growth in the raw milk will not exceed the referenced bacterial limits within that sell-by period if the raw milk is maintained in accordance with the temperature requirements for raw milk set forth in the Raw Milk Testing Schedule and Standards in § 59a.408.

(D) A raw milk permit-holder may submit samples to the Department for analysis to obtain approval to resume a 17-day sell-by period for the raw milk sampled. The Department will approve resumption of a 17-day sell-by period when analysis of a sample demonstrates that bacterial growth in the raw milk will not exceed the referenced bacterial limits within that sell-by period if the raw milk is maintained in accordance with the temperature requirements for raw milk set forth in the Raw Milk Testing Schedule and Standards in § 59a.408.

(b) *Raw milk in customer-owned containers.*

(1) *Container labeling and caps.* If raw milk is packed for sale in containers that are owned by the consumer, Departmental review of the labeling on the container or caps is not required. The Department recommends, but does not require, that customer owned containers be clean, food-grade containers of 1 gallon or smaller capacity.

(2) *Consumer advisory.* If raw milk is packed for sale in containers that are owned by the consumer, the raw milk permit-holder shall post a consumer advisory at the location where the customer owned containers are filled, or in close proximity to that location, to provide consumers notice of increased risks associated with the consumption of raw animal-derived foods that have not been processed to remove pathogens by certain highly susceptible populations. An acceptable notice would be as described in subsection (a)(2). The Department will consider alternative written means of notification of consumers of the potential risks associated with the consumption of raw milk by highly-susceptible populations.

§ 59a.412. Inspection, sampling and testing by the Department.

A raw milk permit-holder shall allow the Department and its personnel to inspect the dairy operation that is the subject of the permit, review records, draw samples, conduct tests and take other actions necessary to the Department's performance of its responsibilities under the act, the Food Act or any other applicable statute or regulation. If a raw milk permit-holder fails to allow this inspection and sampling by the Department, the Department may take steps to revoke or suspend the raw milk permit.

§ 59a.413. Enforcement: Suspension or revocation of a raw milk permit.

(a) *General.* The Department may take action to suspend or revoke a raw milk permit if a permit-holder does not comply with the act or this chapter.

(b) *Procedure.*

(1) The act requires that the Department provide a raw milk permitholder with at least 5 days' advance written notice of a raw milk permit revocation or suspension. This written notice will be sent by certified mail.

(2) If the basis for a proposed raw milk permit suspension or revocation is that pathogenic bacteria have been detected in the raw milk, or foreign substances are present in the raw milk, or any condition exists where consumption of raw milk produced and sold prior to revocation or suspension of the raw milk permit may pose a threat to the health or safety of those persons who consume it, the Department will immediately notify the raw milk permitholder and request that it voluntarily cease all sales of raw milk—without regard to whether the raw milk permitholder has received the 5 days' advance written notice required under the act.

(i) If a raw milk permitholder complies with a request that it voluntarily cease raw milk sales, the Department will consider this cooperation a mitigating factor as it determines any penalty or sanction relating to the violation.

(ii) If a raw milk permitholder does not choose to comply with a request that it voluntarily cease raw milk sales, the Department will do the following:

(A) Apprise the Department of Health and any local health department having jurisdiction with notice of the situation, and recommend these entities take lawful action to ensure that sales of raw milk cease.

(B) Consult with the Office of Attorney General regarding whether it should institute legal action to obtain an injunction to prohibit the raw milk sales.

(C) Arrange for an administrative hearing before a hearing examiner, if the raw milk permitholder requests a hearing on the proposed permit suspension or revocation.

(D) Issue a final adjudication, ordering the suspension or revocation, if the raw milk permitholder does not request a hearing on the proposed permit suspension or revocation.

(c) *Ownership of raw milk permit.* A raw milk permit is and remains the property of the Department—even when it is in the physical custody of the permitholder. If a raw milk permit is suspended or revoked, the person in possession of the raw milk permit shall immediately return or surrender that raw milk permit to the Depart-

ment. In the case of a permit suspension, the Department will promptly return the raw milk permit to the permitholder at the end of the suspension period.

§ 59a.414. Enforcement: Summary criminal prosecution.

If a raw milk permitholder violates any provision of the act or this chapter, the Department may file a summary prosecution against a raw milk permitholder for the violation. The violation is graded as a summary offense.

§ 59a.415. Enforcement: Injunctions.

The Department may ask the Attorney General to initiate legal action to enjoin a person from selling raw milk without the required raw milk permit or from violating the act or this chapter. Violations of an injunction can result in fines or imprisonment, or both.

§ 59a.416. Enforcement: Seizure, condemnation, denaturing or destruction of raw milk; exclusion from sale.

(a) *Seizure, condemnation, denaturing or destruction of raw milk.* Whenever, in the opinion of the Secretary, a given supply of raw milk or illegally-produced raw milk products is considered unsafe or a menace to public health, the Secretary may seize, condemn, denature or destroy the milk or milk products, without compensation to the owner of the milk or milk products.

(b) *Excluding milk from sale.* The Department may exclude raw milk or illegally-produced raw milk products from sale in either of the following circumstances:

(1) The Secretary considers the raw milk or illegally-produced milk products to be unsafe.

(2) If a raw milk permitholder violates a provision of the act or this chapter.

Subchapter G. MISCELLANEOUS PROVISIONS

§ 59a.501. Interrelatedness with Food Act.

The subject matter of the act and this chapter overlaps with the subject matter of the Food Act and the regulations promulgated under authority of that statute in Chapter 46 (relating to food code). This chapter does not restrict, prevent or limit the Department or any other government entity from exercising authority under the Food Act or its attendant regulations with respect to milk, milk products, manufactured dairy products or any other foods.
